

Microsoft Copilot Agent Activation and Implementation

BDO'S MICROSOFT COPILOT AGENT ACTIVATION AND IMPLEMENTATION

The Microsoft Copilot suite empowers businesses to reimagine productivity by embedding generative AI and automation into everyday workflows. As highlighted in Microsoft's 2025 Work Trend Index, AI is now viewed as "intelligence on tap", enabling organisations to scale expertise and address the growing capacity gap. Copilot plays a pivotal role in helping companies transition into "Frontier Firms" — agile, AI-enabled organisations that outperform traditional models. With features that enhance collaboration and streamline decision-making, Copilot supports the evolution towards human-agent teams and dynamic work structures. It's no surprise that forward-thinking businesses are rapidly adopting Copilot to remain competitive in this decisive year of transformation.

At BDO Digital, we understand the complexities of implementing Copilot products and the effort required to ensure your digital estate can adopt these technologies securely. We work with your organisation to activate and embed Microsoft Copilot at scale using BDO's Care+ Framework.
