Modernize Identity & Network Access

To enable Zero Trust for employees, customers and partners in any cloud from anywhere, to any app, AI, or resource

Organizations need identity-centric safeguards that inspire confidence. Companies need a modern platform to replace VPNs, block deepfake impersonations, distinguish agents from humans, and stay ahead of the privacy impacts of shifting from human to machine IDs.

BDO offers **strategy, design, proof-of-value and concepts, QuickStarts, deployment, assessments and managed services** to help clients gain **Adaptive Access** and **Secure Service Edge (SSE)** capabilities.

TYPICAL CLIENT CONCERNS

Limited Resources

Over allocated personnel and financial resources hinder modernization efforts.

Emerging Threats

Modern security teams are under pressure to keep pace with AI-driven threat actors.

Complexity

Complex systems require advanced tools and skills to manage effectively.

Agility

Security teams struggle with knowing where to start and how to progress with identity & SSE modernization

BDO's **POC** CAN HELP

Unified Adaptive Access using Conditional Access for remote networks, devices and apps

ID & Entitlement Management using AI-based lifecycle and privilege access management

Enhanced User Experiences with remote access identity & self-service administration

Consolidation of on-premises network services, such as VPNs

Proof-of-Concept

Identity & SSE Modernization

TYPICAL ENGAGEMENT

Our typical consultative POC runs from 1-2 weeks.

KEY BENEFITS OF BDO's POC

- ▶ **Future-Proof Security Architecture:**
 - Get a view of the “art of the possible” and how your organization can achieve it
- ▶ **End-to-End Partnership:**
 - By combining leading technical and business perspectives, we empower organizations to strategize and implement future resiliency, ensuring they stay secure and competitive in an ever-evolving landscape.

PHASE 1 Workshops

Customize & scope Microsoft's **Zero Trust architecture** and pathways for your organization.

PHASE 2 Deploy

Identify opportunities & challenges of a modern identity & SSE platform using a **Entra Suite POC service** as conduit.

PHASE 3 Report

Review curated insights from the POC to set priorities and build a **deployment plan**.

PHASE 4 Next Steps

Craft an executive read-out and position POC **findings & Identity & SSE Architecture** for action among your leadership.

How BDO Helped a Healthcare Association Improve Device Security Using Zero Trust Services

Industry:

- ▶ Healthcare | Research

Brief Company Description:

- ▶ Global association dedicated to the care for surgical patients, their safety and well-being. The association advances the field of surgery through its various programs, publications, and initiatives

Area of Focus:

- ▶ Distributed device security and remote user access

BUSINESS CHALLENGE

- ▶ To support the global pandemic, the association's workforce moved to a remote access model, challenging the on prem security systems
- ▶ With BDO, the association decided to adopt cloud-based, Zero Trust services for remote access

SOLUTION

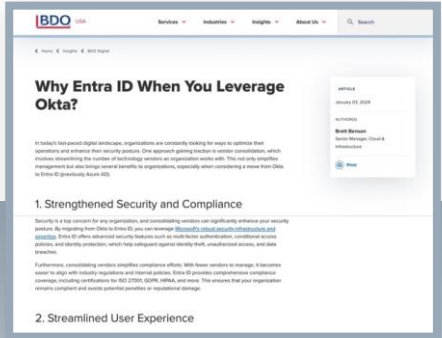

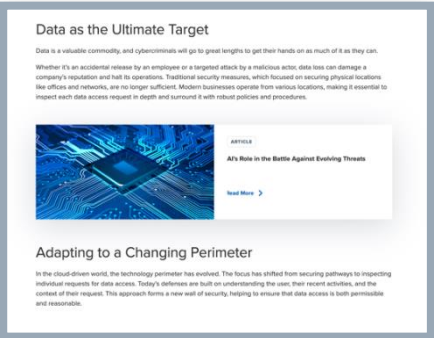

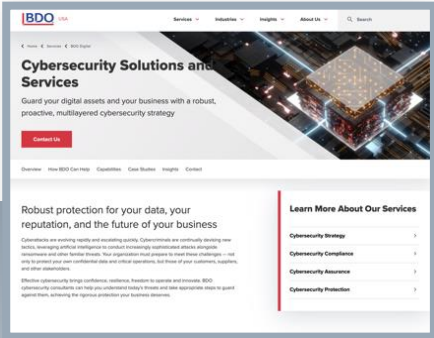

- ▶ BDO migrated the association off on-prem Active Directory and into Microsoft Entra, for cloud-based, always available Identity as a Service (IDaaS)
- ▶ BDO migrated the association's devices into Entra and deployed Microsoft Intune, for centralized, cloud-based, always available device configuration management and data access

RESULTS

- ▶ Seamless support global, remote workforce with confidence that every authentication is evaluated against centralized Zero Trust policies
- ▶ Adaptive access controls are available for access to sensitive data using device health, device location and other criteria to empower additional remote, secure work that wasn't supportable previously
- ▶ Reallocating ~20%+ on strategic priorities
