- Improve all security aspects of a digital organization

How does it work

Additional security and safety to your Microsoft 365 tenant. The following features are available but not limited to:

Step 1 | Discovery

Meet with a BDO IT Consultant to explore and discuss which offering and add-ons are best suited for you.

Step 2 | Deployment & Configuration

The Cloud Team works to procure and provision licenses while our Cybersecurity Team works to configure security requirements.

Step 3 | Support

A BDO IT Consultant is readily available to answer any of your questions and technical concerns.

Summary

Get the most out of your Microsoft 365 security by leveraging licenses such as Microsoft 365 E3, Microsoft 365 E5, and Microsoft Defender. Use Azure Sentinel to safeguard your organization's digital footprint and protect your Azure Environment. Microsoft uses the latest machine learning and artificial intelligence techniques to protect devices, secure identities, and detect threats for over 400,000 customers.
