Power Apps Jumpstart
2 Weeks PoC

Learn how to start replacing your aging legacy applications or create and modernize new applications quickly and efficiently using Microsoft Power Apps.

Building apps with Power Apps allows you to solve and automate business problems with little to no code.

What is the value?

Realize value quickly across 3 key areas;

- **Application Development** Build simple solutions or complex business applications, rapidly build apps in an agile way quickly getting to an MVP

- **Application Modernization** Replace aging legacy business applications, digitize and automate forms, spreadsheets & workflows

- **Intelligent Process Automation** Use AI to optimize, modernize and automate business processes, automate manual or repetitive tasks, digitize and automate business processes

Deliverables

The deliverables will include a high-level assessment and recommendation for leveraging the Microsoft Power Platform to address business challenges. A proof of concept (POC) may be developed as a method to demonstrate the feasibility and verifying the recommended approach to solve the business problems.

How does it work?

WEEK 1 // ASSESS & RECOMMEND In collaboration with your stakeholders BDO Lixar will conduct a high-level review of the business needs and provide an assessment of how a Power Apps solution can address existing challenges. Next, we provide multiple solution approaches and options that vary in complexity, scale, time to market and investment. Together with your stakeholders the most appropriate solution can be identified quickly and easily.

WEEK 2 // PoC DELIVERY Using agile methodologies and leveraging the Microsoft Power Platform along with Microsoft 365 and Azure, BDO Lixar will rapidly build a Proof of Concept that quickly demonstrates the Art-of-the-Possible solution.
