RPA & Intelligent Automation Jumpstart
6 Weeks PoC

Automate your workloads with RPA for increased productivity and revenue growth.

Did you know that more than 60% of employee time, on average, is spent on non-productive and non-revenue generating activities, leaving only less than 40% for high value actions. The Solution? Let the BDO LIXAR team show you how to get started automating your workloads and business processes with Power Automate leveraging this 6 week accelerator offer.

What is the value?

Implementing RPA & Intelligent Automation can help you;

- Reduce heavy manual data entry
- Increase consistency in execution of business processes
- Scale workloads quickly as needed
- Increased employee retention and satisfaction

How does it work?

1. **Assessment & Art of the Possible** BDO LIXAR and your stakeholders will work together to understand the vision of your organization and the needs of your team, employees & partners. We will assess your existing operations and discuss challenges to determine areas for process automation and efficiency improvements.

2. **Recommendations** Leveraging the functionality of Microsoft's Power Automate, we will work with your team to recommend a priorities list of tactical and strategic initiatives with the focus to enable RPA capabilities, increase efficiencies and reduce cost – all aligned with your strategic vision and goals.

3. **PoC Execution and Roadmap** Working with assigned stakeholders, we will deliver a roadmap to execute on your priorities. By training key employees on RPA enablement and best practices, we ensure your roll-out plan for the organization is designed for optimal end user adoption.

Deliverables

▸ **Weeks 1-2**
Complete the assessment

▸ **Weeks 3-4**
Deliver recommendations and roadmap

▸ **Weeks 5-6**
Deliver PoC on one workload
