Zero to NetZero
Readiness Assessment and Jumpstart

We will evaluate your existing Climate GHG emissions reporting objectives and align opportunities for improvement with the power of agile cloud-based technologies.

We help you:

- Assess your current readiness to meet industry-specific regulatory, stakeholder reporting and disclosure expectations
- Examine how to leverage the customizable capabilities of Microsoft solutions such as Sustainability Manager, Cloud for Sustainability, Synapse, Data Lake, and Power BI to innovate and accelerate your Sustainability initiatives
- Integrate environmental and risk advisory subject matter expertise with data and artificial intelligence solutions to build a fit-gap assessment and roadmap that allow organizations within any industry to jumpstart your Sustainability impact

---

Zero to NetZero: Sustainability Reporting Readiness Assessment and Jumpstart:

WEEK ONE: *Discovery Workshop*
- Understand existing reporting capabilities, and technology landscape and organization priorities
- Identify business challenges and opportunities.

WEEK TWO: *Jumpstart*
- Identify industry-specific reporting needs
- Design a data strategy to align organizational goals
- Develop coaching objectives for users
- Build a technology roadmap to activate Cloud for Sustainability reporting
