HERONETZERO *Powered by BDO HEROPATH*
Sustainability Reporting Accelerator

HeroNetZero Powered by BDO HeroPath is a scalable and flexible, accelerated approach to data integration and Sustainability reporting built on the Azure Cloud. **Deploy modern data management solutions to meet your Sustainability goals.**

Our HeroNetZeroPath is a comprehensive end-to-end service designed to help organizations drive and accelerate their Sustainability initiatives leveraging the power of Microsoft cloud-based technologies.

Deliverables

At the end of HeroNetZEROPath accelerator implementation, you will have:

- Understanding of industry-specific business drivers and risks, and reporting and disclosure needs
- Initial Sustainability Manager reporting on organization-wide Scope 1 and 2 GHG emissions
- A line of sight to developing advanced analytics to progress organization's Sustainability strategic targets including Scope 3 GHG emissions
- Super users set up and ready to take your Sustainability strategy to the next level

Pricing is variable based on the requirements, scope.

Hero NetZERO Path
Turning Data into insights, fast

Microsoft | Cloud for Sustainability

DATA SOURCES → DATA FACTORY → DATA LAKE STORE → AZURE SYNAPSE → POWER BI → **ACTIONABLE INSIGHTS**

INGEST → **TRANSFORM** → **ENGAGE**

Data Factory extracts the data and loads it to the Data Lake

Incoming data is persisted in the unlimited Data Lake Store

Sustainability Manager

Sustainability Manager performs the calculations

Azure Synapse Data Warehouse securely exposes the data to Power BI

Our team of experienced Sustainability experts and technology consultants collaborate closely with your organization to implement Microsoft Sustainability Manager, architect data ingestion and interpretation.

Hero NetZERO Path
Turning Data into insights, fast

Environmental Footprint Analysis	Real-Time Monitoring and Reporting	Collaboration and Engagement	Integration with Existing Systems	Advanced Governance Reporting with Analytics & AI

Unify Data Intelligence. Drive Actionable Insights.

We help you quickly develop reporting with decision-ready analysis that aligns with your goals and values while delivering action-oriented reporting that enables your business objectives.

Fuelled by best-in-class components, such as Sustainability Manager, Cloud for Sustainability, Synapse, Data Lake, and Power BI.

We help you solve for:

- Limited integration of data and siloed data sources and structures
- Inconsistent data accuracy and quality
- Manual, labor-intensive practices for collecting and reporting
- Reporting that lacks clarity or fails to make a business impact
- Growing demands for disclosure and higher stakeholder expectations regarding reporting transparency and auditability

HeroNetZEROPath accelerator implementation steps:

WEEK ONE Project Kick off / Sustainability Training
WEEKS ONE & TWO Data Discovery & Sustainability Manager Platform Setup
WEEKS THREE & FOUR Data Ingestion, Interpretation and Analysis
WEEK FIVE Dashboard Design and Initial Sustainability Manager Deployment
WEEK SIX Fit-gap assessment of Advanced Governance Reporting and Integrated Finance or Operations Reporting

Key Benefits of HeroNetZEROPath

Turning Data into insights, fast

Accelerated Sustainability Goals

Accelerate your sustainability objectives

- Drive meaningful change across your organization
- Align with global sustainability frameworks and climate emissions reporting standards.

Improved Efficiency and Cost Savings

Optimize resource usage, reduce waste, and enhancing operational efficiency

- Achieve cost savings while reducing your environmental impact.
- Identify areas of improvement that drive financial benefits and sustainability

Enhanced Stakeholder Engagement

Effectively engage and communicate your climate change efforts

- Build trust, enhance your brand reputation, and attract new opportunities

  Demonstrating your commitment to responsible business practices to all stakeholders

Future-Proofed Business

Integrate sustainability into your core business strategies

- Future-proof your organization against evolving regulatory requirements, changing market demands, and emerging risks
- Build resilience, competitiveness and agility

Our approach integrates environmental and risk advisory subject matter expertise with data and artificial intelligence solutions that enable organizations within any industry to innovate and accelerate their Sustainability impact.
