

# CLOUD COMPROMISE ASSESSMENT

RELIABLE THREAT HUNTING FOR YOUR PEACE OF MIND

As more companies transition to public, hybrid, or multi-cloud infrastructures, a pressing question arises; how can they be sure that they haven't already fallen victim to breaches within their Azure, multi-cloud or hybrid environment? Tight project deadlines may sometimes lead to the inadvertent oversight of crucial security practices in their broader digital and physical landscape, such as secrets management and the principle of least privilege.

BDO Digital's integrated team brings together seasoned experts operating independently with a unified mission of advanced persistent threat hunting. We are committed to proactively identifying and mitigating potential security incidents within complex organisational environments. Our primary goal is to proactively detect and address security threats across the organisation's digital landscape, ensuring minimal disruptions and safeguarding critical assets.

## Our Approach

**Planning & Scoping:** Define the scope, objectives and constraints of the assessment, identify the assets to deploy specialist software (EDR/NDR/XDR).

**Sweep:** Conduct assessments, gather data and sweep through the environment to identify Indicators of Compromise/Indicators of Attack (IOC/IOA).

**Analyse & Respond:** Analyse the collected data, confirm incidents and prioritise based on their impact. Respond, remediate and re-assess.

**Report:** Provide stake holders detailed report of the findings, actions taken and future recommendations.

## Proactive Threat Discovery

- ▶ Early incident identification
- ▶ Confirmation and prioritisation
- ▶ Response strategy, remediation and prevention
- ▶ Continuous improvement and compliance

## BDO Digital

## GLOBAL CHALLENGES. PRAGMATIC SOLUTIONS
