A Mobile App for All Your Health and Safety

Compliance
Genie

Recent decades have seen a significant shift in how people work due to the adoption of mobile applications (apps).

In the health and safety industry, workers need to quickly implement procedures, monitor working conditions, and have access to real-time data on the move. This has accelerated the popularity of safety apps being utilised across many industries.

Be-Safe's Compliance Genie is a cloud-based mobile app that enables workers to efficiently support the running of Health and Safety processes when they are away from their desks. It is one of the most powerful tools at your disposal, enabling you to stay on top of things like the delivery of risk assessments, timesheets, lone-worker tracking, and the reporting of accidents.

Today, mobile technology is much more affordable, accessible, and 'smarter.' The popularity of safety apps is being driven by the substantial benefits companies are seeing from using them.

Better safety data, higher worker productivity, greater collaboration, higher levels of employee engagement, and, most significantly, better compliance, are just a few of the advantages you get with Be-Safe's Compliance Genie.

Over the past ten years, many functions within organisations have undergone the digital transformation of operational procedures. As well as being ISO 27018 compliant, Be-Safe's Compliance Genie supports the revolution in health and safety management taking place across all industries and business areas and is a catalyst for rapid change.

Waiting to digitise health and safety within a business can result in significant costs for the whole enterprise. These expenses, however, will be present in your people, processes, and culture even though they are frequently concealed below the surface.

Acting now could save time, money, and lives, while inaction can negatively impact your company's performance across a number of areas, not least of which is employee safety.

• Digitise your health and safety today to be safe, secure, and compliant.

How can the Be-Safe All-in-One Health and Safety App benefit your business?

The multi-award-winning Compliance Genie from Be-Safe, is a cloud-based Health and Safety App that has a comprehensive range of features and benefits that any company, in any industry, in any country can use.

Digitise your health and safety processes for improved real-time, on-site efficiency, that can be accessed by any employee or contractor - preventing essential tasks being missed and ensuring your company stays safe, secure and compliant.

Empower Your Entire Workforce

Designed by experts in building Apps and in Health & Safety, the cloud-based Compliance Genie can be accessed across multiple channels and devices - including Android and Apple phones and tablets - and can be used by any employee or contractor wherever they are.

Keep Your Company Safe

The Compliance Genie will help your company become, and stay safe with its comprehensive range of features that cover all aspects of health & safety management at work - digitally. No more time-consuming paperwork!

Streamline Health & Safety Procedures

Fully customisable dashboards allow your company to streamline procedures to be accessible 24/7, instantly updatable, and to create a more efficient and improved culture of safety in the workplace.

Improve Quality & Efficiency

Whatever industry you work in, wherever you are based in the world, and whatever size you are, you can improve your company's health and safety management by making everything much faster to implement and instantly available.

The Future of Your Company - Why you should digitise with The Compliance Genie

Transform Your Safety Management Processes with the Compliance Genie. The mobile safety app can change the way you manage safety.

Improve Safety Data Quality:

Instead of waiting until they get back to the office, field staff can collect data of higher quality while on the go and facilitate quicker decision-making. As a result, there is higher compliance with safety standards and better quality safety data.

Raise Employee Productivity:

Your safety staff will save a significant amount of time by eliminating manual data collection and reporting, which will ultimately result in higher employee productivity.

Enhance Collaboration:

With the help of The Compliance Genie, communication is facilitated more quickly, which fosters productive teamwork within the organisation.

Improvement in Employee Engagement:

Develop a culture where safety concerns are addressed quickly. Employees are more likely to feel empowered and engaged when they can directly see the results of their work or feedback.

Increase Safety Compliance:

Compliance Genie will make it easier for your staff to follow safety rules by giving them quick access to the latest checklists and safety rules. When employees have access to the information they need, it is easier for them to follow safety rules.

Cloud-based security:

Be-Safe's Compliance Genie makes use of Microsoft Azure, the first cloud computing platform to adhere to ISO/IEC 27018, the only international standard for privacy controls in the cloud.

Why should businesses use The Compliance Genie?

By moving away from manual, high-touch, paper-based tasks that historically can result in duplication of effort, errors, and issues with audits, colleagues are empowered to provide rich data by using The Compliance Genie instead of traditional tools like pen and paper or spreadsheets. The Compliance Genie is quick to learn and easy to use, so your co-workers should have no trouble adapting to and engaging with it. This makes creating a culture of safety easier than you might think.

Real-time responses to incidents and events show colleagues and contractors that their feedback is valued and taken seriously. This is another way that real-time data for your colleagues can help promote adoption.

It goes beyond just ensuring the health, safety, and happiness of your employees. Having easy access to clear and relevant data can do more than boost the health of your business and your safety culture. Making sure you are compliant will help you avoid costly legal fees, penalties, rising insurance rates, and serious repercussions for both your organisation and specific people!

• **Digitise your health and safety today to be safe, secure, and compliant.**

Be-Safe Is Your Partner in Health and Safety.

It's time to introduce tools that are accessible to everyone in the company, not just the Health & Safety experts. Be-Safe's Compliance Genie is key for the workplace of today in building a healthy, happy, and sustainable business.

The Compliance Genie eliminates time-consuming manual processes and offers the power of data your business can use to a much greater effect, while being future-ready with safety and compliance.

Our goal at Be-Safe is to increase worker safety, well-being, and productivity no matter where they work. A smart and straightforward safety culture can be developed within your organisation with the help of Be-Safe's Compliance Genie, a smart, scalable, and secure platform that allows you to digitalise incident reporting, audits, checklists, and inspections, risk assessments, and method statements.

Be-Safe will empower your workforce.

The Compliance Genie's innovative technology enables you to be responsible, productive, and safe at work. Find the gaps and new trends so you can launch new initiatives to manage risk, promote sustainability, and increase productivity throughout your entire business.

With Be-Safe's Compliance Genie, you can:

- Report near-misses, incidents, accidents, and safety concerns.
- Evaluate, track down, follow up, and quickly resolve incidents.
- Automate straightforward teamwork using secured data sharing.

With the help of the Compliance Genie, your company is able to:

- Digitise your strategy, use dashboards to implement controls to lower risk.
- Compare risks across the organisation and identify key areas.
- Provide a clear picture of the organisation's overall risk exposure.

You can view, filter, and download real-time visual reports based on your data using the Compliance Genie's dashboard tool.

You can identify important trends using the dashboards, which provide specialised and easy-to-read visuals of the data. The Compliance Genie can be used to run management meetings in place of flat paper reports or intricate spreadsheets.

What our customers say:

“

The **adaptability** of the system means you can make it **truly bespoke**. It has dashboards that you can make report what you want to see: the data that is important to your business and culture.

Gymshark Safe and Sound Manager, UK

Conditioning Clothing supplier in 230 Countries

”

“

The Genie has been easy to use, implement and tailor to our exact specifications and has increased staff engagement with **Health and safety** across all departments – and it played a significant part in helping us get **ISO45001** too!

Customer service has been exceptional.

Head of Health & Safety

Provider of 400 veterinary centres across the UK

”

“

Compliance Genie allows us to monitor and achieve our KPIs in real-time, whilst remaining compliant with all things **Health & Safety**. We use the system slightly differently from most organisations, as it is fit for purpose across **multiple applications**, not just **Health & Safety**. The constant new features and system support from **the Genie team are second to none.**

Fleet & Operational Support Manager

Service provider to UK Local Authorities and Police

”

“

By using **The Compliance Genie** at CRSW I can ensure that everyone is safe, secure, and importantly, more efficient too. As a business owner **what more could I ask for?**

MD, Central Roofing South Wales

One of the UK's largest Roofing and Cladding companies
