

Build a Power Platform-based solution to digitilize your business processes

POWER PLATFORM ASSESSMENT WITH BEANTECH:

beanTech supports companies in the challenges of Digital Transformation and helps them in new opportunities with digital technologies. We integrate communication, collaboration and we share solutions to improve and automate business processes and customer management.

Why customers choose Power Platform assessment:

Complete an assessment in the context of business processes is essential to understand the needs of company departments, in order to optimize activities while minimizing waste of time

WHAT WE OFFER

beanTech performs business process analysis, with the aim of defining customer needs about key processes that can be structured and digitalized through Microsoft Power Platform, as Power Apps and Power Automate.

The resources available have functional and a technical skills, in order to support the customer in its digital transformation and define the projects and its application.

The assessment is also aimed of defining training sessions for key users and system administrators.

The projects that can be developed at the end of the assessment may concern different company departments, such as purchasing, sales, marketing, hr.

The following are examples of Power Platform-based solutions, already used by several beanTech customers:

- Project management
- Event management
- Lead management
- Visit report management
- Onboarding management
- Spare parts management
