

Bechtle Azure Migrate Package.

Are you reaching capacity limits with your data center? Take the step to Azure and benefit from a wide range of expansion and scaling options and simple administration. Bechtle accompanies you during the move with a holistic approach and years of experience.

WHY SHOULD YOU CARE?

Planning and performing a migration to Azure often raises many questions for businesses. From the technical requirements for a migration to the selection of suitable workloads and applications. Bechtle helps you with these challenges with workshops and implementation packages. With the „Bechtle Azure Migrate Package“ they manage to create the organizational and technical framework to carry out their migration to Azure in a structured and problem-free manner.

WHAT DO WE OFFER YOU?

In special sessions we look at the most important components of an Azure migration: **Analyse – Plan – Ready – Migrate.**

WHEN SHOULD YOU LEVERAGE THE PACKAGE?

As soon as you outsource the first productive workloads to the cloud and want to be sure that you have considered all relevant points. But even earlier on your way to the cloud, we can help you with examples and experiences to find the best strategy for you.

WHAT DO YOU GET FROM IT?

The offer includes both a series of workshops and implementation packages. Bechtle's holistic approach encompasses both analysis and conception at the corporate and technical level, so that the use of Azure can be ideally embedded in your IT strategy and practices. Finally, the practical process of the migration is shown on a workload. The series of workshops can be adapted to your company size and is therefore aimed at SMEs as well as larger companies.

WANT TO FIND OUT MORE?

Benefit from the many years of experience of the Bechtle Azure experts in the conception and implementation of Azure migration scenarios.

Analysis.

- Initials Alignment
