

IoT-StarterBundles.

Entry packages with all necessary components for a first Industrial IoT solution „out of the box“.

With sensors and cloud gateway to a scalable analytics platform on Azure.

- Easy entry into an IoT project, thanks to all-inclusive retro-fit bundles.
- Monitoring and predictive maintenance of your systems, machines and production processes.
- Detect anomalies before failures or consequential damages occur.
- Scale further from the StarterBundle and analyze even more objects on one platform.

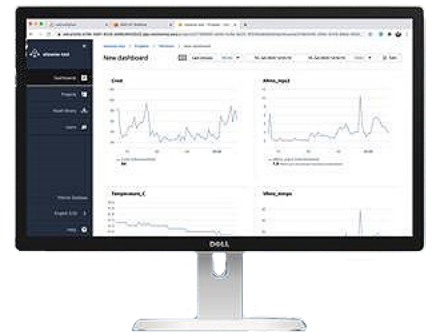

With common architecture and management on-premises and in the cloud, immediate business value can be quickly be generated.

ifm sensors
offer variety and flexibility.

CloudRail.Box
the gateway to cloud.

Analytics-Plattform
Azure IoT Central.

We accompany you on the way to IoT solutions that meet your business requirements for your production processes flexibly and efficiently. Start your IoT journey today.

Let our Bechtle specialists advise you on IoT solutions.

IIoT-StarterBundles.

For production environments, the Smart Manufacturing Bundle is equipped with sensors for counting the produced goods. The condition monitoring package is ideal for condition monitoring and predictive maintenance of motors, drives and pumps. If you should not find your use case here, we will be happy to put together an individual package that allows you to start in your IIoT use case. Contact us at: iot.bonn@bechtle.com

SMART MANUFACTURING.

Sensors

- 5x product counting

Gateway

- 1x CloudRail.Box

Platform

- Azure IIoT Central
- Azure-Subscription for 3 Months

Service

- kick-off workshop
- implementation
- configuration
- follow-up workshop

4.500 €*
*excl. VAT

CONDITION MONITORING.

Sensors

- 1x Vibration sensor

Gateway

- 1x CloudRail.Box

Platform

- Azure IIoT Central
- Azure-Subscription for 3 Months

Service

- kick-off workshop
- implementation
- configuration
- follow-up workshop
