

Step-up your Faculty Performance and your Students Engagement

- 1** State-of-the-art platform that provides tools to improve algorithms, programming, database and SQL classes
- 2** Change the way you engage with students and be able to follow their learn evolution in real-time
- 3** Functionalities to setup disciplines, homework, exams and assign them to your students
- 4** The platform is accessible through the internet and fully compatible with in-class or remote learning
- 5** Get out of the sameness of multiple-choice tests. Give your students access to real logic and programming challenges
- 6** Allow your students to program online, run their code and receive answers immediately
- 7** Evaluate your students' learning performance in real time using a state-of-the-art code execution and judgment system
- 8** Make multiple programming languages available to your students
- 9** No need to invest in additional infrastructure as the platform fully runs on our cloud

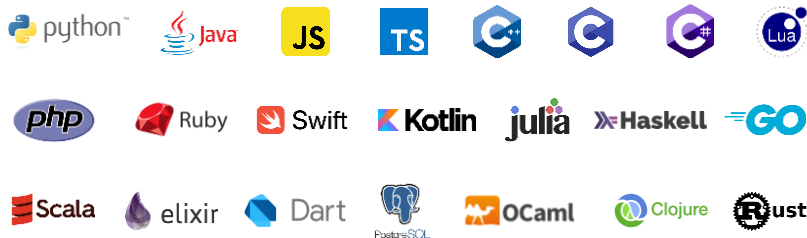

Some Numbers, Data and Metrics

25+ Programming Languages (and increasing...)	2400+ Exercises / Challenges Available	9 Challenges Categories	10 Difficulty Levels	3 Languages (English, Portuguese, Spanish)
37+ million Submissions and Codes Judged	Customize Exercises / Challenges to your audience	4300+ Professors approve	1000+ Educational Institutions use	100+ Countries

Full Integration with your Learning Management System (LMS)

Some of the supported Programming Languages...
