

# One number, one experience, across all devices

## Microsoft Teams Phone Mobile

Imagine a future where your workforce operates seamlessly, no matter where they are or what device they're using. Where all your communication and collaboration tools are unified on one platform, so your employees can answer and make calls through a single, business-provided phone number using any device. Where your team can engage whether in the office, on the road or working remotely, all within a secure and compliant environment. With **Microsoft Teams Phone Mobile from Bell**, that future can start today.

### Benefits of Microsoft Teams Phone Mobile from Bell

#### Empower mobile teams

Calls ring across devices, and employees can easily switch between devices at any time, making the move between home, office or any other location seamless.

#### Improve communications management

Consolidate mobile and fixed-line management to one secure platform, offering full visibility of all users and enables easy moves, adds and changes.

#### Secure work anywhere

Manage enterprise-grade security and compliance policies across mobile devices and Microsoft Teams, by applying integrated call recording and ensuring robust protection of all endpoints.

#### Enhance customer experiences

Solve customer issues faster with data synced across devices, so key information can be shared before calls are transferred, reducing the need for customers to repeat themselves.

#### Improve cost predictability

Make business adjustments and only pay for what you need with easy scalability and month-by-month billing.

#### Connect employees reliably, wherever work takes them

Get high-quality calling wherever your employees work on Canada's best 5G network<sup>1</sup> and the largest SIP infrastructure, so your teams stay connected from anywhere.

## Discover tailored calling solutions for Microsoft Teams from Bell

In addition to Microsoft Teams Phone Mobile, our Bell Calling for Microsoft Teams portfolio includes:

- ✓ **Operator Connect**  
Integrate the features of Microsoft Teams with Bell's high-quality PSTN network through a cloud-based service and easily upload telephone numbers directly into the Microsoft Teams Admin Centre.
- ✓ **Direct Routing as a service**  
Connect your Microsoft Teams platform to the PSTN via our own virtual session border controllers (vSBCs) for reliable connectivity.
- ✓ **Direct Routing on premises**  
Keep full control of your communications infrastructure for greater flexibility with custom routing options.

## Why choose Bell for Microsoft Teams
