

Modern 3-Day IT Assessment

Who is BEMO?

BEMO is a Microsoft Gold Partner that is specialized in helping orgs with 20 to 200 employees migrate their legacy IT infrastructure to Azure and Microsoft 365.

What will you receive?

We are obsessed with customer success and we want to guide your organization through the process of migrating to the cloud. It can be really complicated to move that file server, email server, domain controller and more to Microsoft 365 and we know you don't want to mess up, lose your data, or be offline to your customers! We will meet with you over 3 days to ask you questions about your setup without using too much tech jargon and then we'll give you a roadmap. That means you get a PDF with the 2,3 maybe 6 phases of what you ought to do, the order of which you should do it, the time commitment and schedule, as well as how much it would cost you in one-time migration fees, and then recurring licensing of Microsoft 365.
