Migrating to the cloud is stressful!

Organizations with 20 to 200 employees find migrating to the cloud stressful because they don't feel comfortable doing it themselves because of the possible loss of data and business downtime.

CHALLENGES

Orgs with 20 to 200 employees want guidance with how to migrate their legacy IT infrastructure to the cloud. They don't have the staff with the experience of completing this type of work over an over again.

IDEAL SOLUTION

We develop a migration roadmap that will give you a phased-approach for how to migrate all of your data to Microsoft 365, along with a schedule, effort in time, and cost of doing so.

DESIRED OUTCOMES

Customer success means migrating all your email, file, server, and domain controller data to Microsoft 365 and Azure where your IT is now easy to manage and is secure from cyber attacks.

Modern 3-Day IT Assessment

We make migrating to the cloud painless for organizations with 20 to 200 employees by giving you a comprehensive roadmap.

1 **A Comprehensive Migration Roadmap**

You'll get a detailed plan for what we'll migrate, the order of which we'll do it, the schedule and timeline, as well as estimate one-time costs

2 **Microsoft Product Experts and Engineers**

Over 80% of our staff either worked for Microsoft or another Microsoft Partner, so we know everything that is and isn't possible with Microsoft solutions

3 **Manage all your IT from one place**

Migrating to Microsoft 365 and Azure simplifies your IT and allows you to access and manage your data remotely from any device

BEMO Modern IT Assessment & Microsoft 365

We help you with the stressful event of migrating to Microsoft 365 and Azure because we know once you do it you will breathe a sigh of relief. Having all your data and applications run on Microsoft's platforms will bring you and your employees' peace of mind

Simplified IT

We migrate all your data from systems that don't talk to each other to a unified system that managed all your IT

Easy to Support

Because all your data resides on the same platform and everything is integrated, it becomes fast and easy to solve employee issues

Painless to Scale

In less than 60 seconds you can add or remove employees from their account and approve/remove access to everything they need

Customer success: Hunter Benefits

Hunter Benefits is a 32-employee retirement benefits organization that was running their organization on disparate technologies from Slack for internal communications, Vonage for phone, a file server for file sharing, Gmail for email which made it hard to work, especially from home. We gave them a 9-phased approach over 3 months that would migrate all their applications and data to Microsoft 365 and Azure

Work from Anywhere

Having to previously use a VPN to access the office's file server from home, this was slow and cumbersome to use. But with files moved to OneDrive and SharePoint online, employees could seamlessly work from home without a VPN

Easy to Support

Their employees used to open tickets all the time because systems weren't talking to each other making it hard to pinpoint which vendor was causing issues. After the migration, employees opened 60% fewer tickets

Easy to Scale

Once everything was migrated to Microsoft 365 and Azure, Hunter Benefits was able to onboard new employees from the companies they acquired within minutes
