

BEMYCAR

Turn your leads into sales

WHAT IS BEMYCAR?

Bemycar is the solution to help you sell or rent more vehicles thanks to our technology which, integrated into your CRM or DMS, allows you to contact, enrich (advanced qualification) and classify by probability of purchase 100% of the potential customers (leads) that you generate online automatically and effortlessly. This way you can attend to all of them instantly and manage them in a personalised way, minimising your costs and maximising your sales.

HOW DOES IT WORK?

Mainly through a technology so advanced and complex that for you and your customers it will always be easy and simple.

And thanks to it, when any lead is interested in one of your cars/services, we are able to attend to it, manage it, classify it (by probability of purchase) and enrich it immediately, extracting the maximum information from it so that later, in real time, it can be uploaded to your CRM (or any other platform you wish) and your salespeople can always prioritise the leads with the highest probability of conversion with the aim of achieving more sales, but also in an efficient and personalised way by knowing EVERYTHING about them.

We achieve this with intelligent technology that works automatically, automated and 24/7 (or as you wish) with the comfort, peace of mind and security that this means.

INVESTMENT

At Bemycar we work with different flexible plans without permanence so that you can choose the one you prefer. With all of them you will always invest less than €1 per lead managed.

ADVANTAGES

FOR YOUR CLIENTS
