

Case Study: End-to-end Global Mobility Solution

Results Achieved

1

End-to-end solution

1

Source of truth

1

Place for all data

A GAME
CHANGER
For the company

CHALLENGE

A large American e-commerce company was looking for the holy grail of Global Mobility in one platform. They wanted one solution that included:

1. A tool to manage all internal work
2. A tool to coordinate work with vendors – making it fast, streamlined and an easy process
3. An engine to manage core-flex policies and have employees do the selection process and pick what they need.

Their program was growing fast and they wanted to unlock the power of data with a true end-to-end solution.

SOLUTION

AI-powered platform and system of records with data insights, cybersecurity, and automated global payments – a full end-to-end solution.

...THE BEAUTY OF BENIVO IS ONE INVOICE, ONE SOURCE OF TRUTH IN TERMS OF REPORTS, REALLY GOOD ANALYTICS AND DASHBOARDS, AND THE ABILITY TO TRACK SLA'S. IT'S WHAT WE NEED FOR OUR EMPLOYEES – IT'S A GAME CHANGER!

WHY THE COMPANY SELECTED BENIVO

They reviewed many options in an effort to streamline this process. They selected the Benivo platform given it has the capability to do 3 in 1:

1

Tools for Global Mobility Teams

Everything you need from cost estimates to real-time data and predictive analytics

2

Vendor Management and Payments

Their service providers are initiated through Benivo's Vendor Management platform – a process that is seamless to their employees. You can use any vendor on the market. Benivo's cybersecurity reduces the risk of data breaches by vendors, and downstream vendors by 97%. It has the ability to track vendor SLA's and more.

3

Employee Experience

An employee platform whereby employees select and initiate all their flexible benefits, access all the information on a single platform, learn from colleague's experience, and get support in the relocation process.

The Benivo platform sits above all our tools right now— we initiate everything from this platform, for example household goods shipment. Almost like a shopping cart – you add everything to the cart, check out and that initiates these services with the vendors. - Head of Global Mobility
