◎ The Engagement will include:

Assessment and Readiness

Preparation and Planning

◎ Assessment and Readiness

1

Assess your organization's needs and goals.

2

Review user readiness for copilot

3

Assess customer licensing and technical readiness, address gaps, and work closely with you to address any gaps to ensure a seamless Copilot deployment.

4

Define the scope and requirements for Copilot integration

5

Assess customer's data protection and governance posture and address gaps

6

Showcase the value of Microsoft 365 Copilot

7

Evaluate and support Microsoft 365 Copilot technical readiness

© Assessment and Readiness

1

Provide in-depth technical support to ensure that your organization is fully prepared for the implementation of Copilot

2

Identify potential risks associated with the implementation and develop mitigation plans

3

Identify scenarios based on the Customer's business decisions' pain points.

4

Evaluate Microsoft 365 tenant usage and configure security and compliance

5

Build a business case

6

Develop a plan to implement recommendations based on prioritized scenarios.
