# BeScope

The smarter way to adopt Power BI

If you're considering taking your data analytics to the next level, chances are that you will be considering Power BI. But, have you thought about the best route for adoption across your organisation?

Our BeScope solution is a pre-adoption scoping exercise which gives you everything you need to make certain that Power BI is right for your business. Plus, you will receive a high-level roadmap outlining the best approach for a smooth adoption process.

What exactly is BeScope?

BeScope is a collaborative scoping exercise carried out over 3 to 4 weeks, during which time, we will work closely with you to understand exactly what your current painpoints are and what you want to achieve. We will evaluate your existing processes and data infrastructure before presenting back to you, your optimal route for successful Power BI adoption.

	Week 0	Week 1	Week 2	Week 3/4
You and your business	Identify key stakeholders	Team & Stakeholder workshops & define Design Briefs	Provide information on data & architecture	Findings & Proposal communicated
Bespoke	Setup stakeholder workshops	Manage workshops & consolidate findings	Assess current data & infrastructure and assess Power BI architecture options	Outline, document & visualise findings. Present proposal based on audit objectives

Making data. Simple.
