BID MANAGEMENT

with SharePoint built in capabilities.

Secured SharePoint system for online bidding and document submission process

Tenders and Bids: Managing time-intensive and cumbersome tendering process

Award proposals and contract to third-party vendors and saving good amount of time. The add-in helps bidders and evaluators overcome the outdated tendering process. The add-in addresses the technological limitations in a secure SharePoint environment.

BEYOND INTRANET ADD-IN

Bid Management System

Secure SharePoint system for online bidding and document submission process.

CHALLENGES

The system addresses the unsecure and eliminate the dependency on paperwork. Bid documents could be stolen or manipulated in the wrong hands.

IDEAL SOLUTION

A fully automated Bid Management Solution where bidders receive automatic access to designated folders as soon as the bid opens. The solution offers custom email templates at various trigger points which gave more information to the recipients.

DESIRED OUTCOMES

A common SharePoint platform was created where the Bid or proposal owners, reviewer team, and external users (Bidders)- could collaborate seamlessly and complete the bidding process.

BEYOND INTRANET ADD-IN

SharePoint Bid Management System

SharePoint based bid management platform to automate the tendering process.

BEYOND INTRANET

Bid Management System

Create new proposals, add/notify bidders and evaluate bids at each stage. Attach bid-related documents in a secure SharePoint environment.

SIMPLIFIED BID EVALUATION

Bid owner can give access to commercial team for bid evaluation. Evaluators can access folders of bidders and download documents.

MASTER DATA SETTINGS

Create Master settings for easy and quick bid management where Bidders and Evaluators both can have different views and easily manage multiple bidding opportunities.

TRACK BID STATUS AND SET TIMELINES

Track each bid and its status in SharePoint environment with improved bid/proposal document control and compliance.

Beyond Intranet SharePoint Bid Management System

Bid Management System comes with SharePoint built-in capabilities to streamline proposal management process and reducing paperwork and dependencies. The add-in will equip the users with quick project dashboards, filtered views, notifications and much more, all this is automated and controllable.

BID MANAGEMENT SYSTEM

Send bid invites, collaborate and evaluate bids at each stage.

POWER AUTOMATE PACKAGE

For automating the email sending process, users can download the Power Automate Package and import it in their local environment.

UPLOAD DOCUMENTS IN SHAREPOINT

Customize setting based on user levels, assign evaluator roles to individual(s) or team(s) where can only see their own documents due to high-level user permissions.

SHAREPOINT BEST PRACTICES

Gain quick access to project dashboards, filtered views, proposal edits/updates and milestone updates. Customize add-in as per your corporate branding.

Customer success: [International Maritime Industries, Saudi Aramco]

We created a custom digital workflow to automate their manual bidding process. A SharePoint platform was created where Bid or proposal owners, reviewer team and external users (Bidders)- all could collaborate seamlessly and complete the bidding process successfully

MORE SECURED SYSTEM

With an advanced level of user permissions and access levels, the new system was 75% more secure than the traditional bidding system.

IMPROVED COLLABORATION WITH EXTERNAL TEAM

Using the custom-developed bid management solution helped them not only to make the bidding process faster but also seamless. This helped Project owners, the evaluation team and external bidders to collaborate on one platform and work on bids easily.

SECURED AND SEAMLESS EVALUATION PROCESS

The evaluation process also became much smoother, faster as well as secured than the previous one.
