UNLOCK YOUR ERP DATA WITH CUSTOMIZABLE CUES

YOUR DATA, YOUR CUES BeyondCues ensures that the data most relevant to your team's success is always front and center, empowering you to make informed decisions quickly and confidently.

CUSTOMIZE WITH PRECISION Whether it's configuring cues for individual users, specific user groups, or the entire organization, you have the flexibility to design a role center that aligns perfectly with your business processes.

TURN TABLES INTO ACTION Create cues that provide instant visibility into key business metrics, such as open purchase orders, sales trends, or inventory levels. Gain real-time insights and take immediate action.

WORKFLOW COMPATIBLE SOLUTION Seamlessly integrates with your workflows, enhancing productivity without disruption. Add actions to your cues to open reports, pages, and URLs directly – keeping everything just one click away.

NO DEVELOPER NEEDED Easily create and customize cues without technical expertise, saving time and resources. No coding required – set up cues on any available table and start optimizing your data instantly.
