

# The AI Multiplier Company

## BEYONDMINDS

### Beyond The Industry Standard

Promoted for nearly a decade as the next big business catalyst, artificial intelligence (AI) has yet to provide the revolution it promises. While many companies are attempting to implement AI into their businesses, the success rate for reaching production remains low.

BeyondMinds was founded to make the AI promise a reality. Our goal is to enable the world's most sophisticated companies to benefit quickly and enduringly from AI, while freeing themselves of the burdens of its development and ongoing maintenance. By partnering with BeyondMinds, organizations make production-grade, ROI-positive AI the standard, not the exception.

### The AI Multiplier Effect

In order to overcome production challenges, we realized that a different approach is needed towards enterprise-grade AI systems.

**1<sup>st</sup>** 

We identified the foundational AI elements, the business and human truths, that transcend individual industries to create a universally applicable and easily adaptable AI solution. One that is easily deployable for any industry and use case and provides a holistic AI solution for the entire enterprise.

**2<sup>nd</sup>** 

We developed diverse AI capabilities suites (Natural Language Processing, Computer Vision, Time-Series, and Speech Processing) for the BeyondMinds Platform that can be leveraged and combined in an endless number of ways to support value creation across organizations.

**3<sup>rd</sup>** 

We ensured that solutions deployed on top our platform are robust and stable to perform under extreme data and requirements.

**4<sup>th</sup>** 

We designed an intuitive user interface to ensure the solution stays on the rails - integrating explainability, confidence, monitoring, and smart feedback capabilities, ensuring value creation - from day one to day forever.

With this approach, we are helping organizations to holistically and comprehensively scale up and scope out their AI goals to become truly AI transformed - all using one AI platform. This is our AI multiplier effect.

## AI for all Industries and Any Challenge

Being universally applicable and easily adaptable, the BeyondMinds AI platform can adapt to support a variety of use cases in different industries, making AI scaling easier than ever before.

# BEYONDMINDS

BeyondMinds has developed an enterprise-grade AI-as-a-service platform to deliver hyper-customized, production-ready AI solutions. BeyondMinds is accelerating the wide-scale adoption of AI by enabling companies to successfully overcome the challenges that have prevented AI from proceeding “beyond” theoretical proof-of-concept to robust and resilient systems in production.

BeyondMinds' mission is to create AI partnerships that enable the world's most sophisticated companies to benefit quickly and enduring from AI while freeing themselves of the burdens of its development & ongoing maintenance.

Founded in 2018, BeyondMinds has offices in New York, Tel-Aviv, and London, and is working with some of the largest organizations worldwide.
