

Offering 2:

SQL Server 2008 and 2008 R2 – Upgrade and/or Cloud Transition

Beyondsoft Consulting

Microsoft is no longer releasing security updates for any version of SQL Server 2008. End of support for all versions of SQL Server 2008 was July 9, 2019. Beyondsoft is helping customer to keep their applications and infrastructure secure and protected by migrating to current versions and helping with Cloud Transition for greater security, performance and innovation.

Plan your SQL Server 2008 upgrade and/or migration now to avoid security and compliance risks. Beyondsoft will work with you to assess your existing environment and plan for migration to Azure either by upgrading to latest versions of SQL Server on an Azure VM or in place upgrade or moving to SQL Azure PaaS service or a combination of these approaches.

Deliverables and Milestones:

In this 2-week consulting engagement, the following tasks will be performed

- **Week 1:** An assessment of you existing SQL Server 2008 environment including the Windows Servers that they are running on and the applications that are associated with these SQL instances.
- **Week 2:**
 - Based on the assessment, we will provide the right plan of action to upgrade or migrate your instances.
 - We will also perform a POC, showcasing the upgrade or migration of single SQL Server 2008 instance and single database, selected during the assessment process by your team.

This will give you an idea of the benefits of upgrading or migrating before moving forward with complete upgrade or migrations of all SQL Server 2008 Instances and servers.

Fixed Price until Dec 2019 : **\$9,500** (for up to ten/10 SQL Server 2008 Instances/Servers)
