Data Governance and Protection

Why invest in Data Governance and Protection?

With data scattered across different platforms, applications, and clouds, you need a solution that can help you gain a complete and accurate picture of your data estate and its attributes. **Microsoft Purview** is a comprehensive set of solutions that can help your organization govern, protect, and manage data, wherever it lives. It combines the former **Azure Purview** and **Microsoft 365** compliance solutions and services into a unified platform. Microsoft Purview provides:

Improved Data Quality and Efficiency

Effective data governance ensures that the data is accurate, consistent, and reliable, leading to better decision-making and operational efficiency.

Data Security and Risk Management

Reduce the risks of data breaches, fines, reputational damage, and legal liabilities, which can result from unauthorized access, misuse, or loss of data.

Innovation and Cost Reduction

By streamlining data management processes, reducing the need for redundant data handling and enhancing the value of data, enables new business opportunities, and competitive advantage.

Enhanced Collaboration

Foster a data-driven culture, which can empower your employees, stakeholders, and partners to collaborate and share insights based on trusted and secure data.

What We Do

We provide hands-on assistance with onboarding and setting up the optimal configuration for Microsoft Purview solutions.

Data Governance

Data Map.
Data Catalog.
Data Estate Insights.
Data Policies.

Data Security

Information Protection.
Data Loss Prevention.

Insider Risk Management.
Information Barriers.

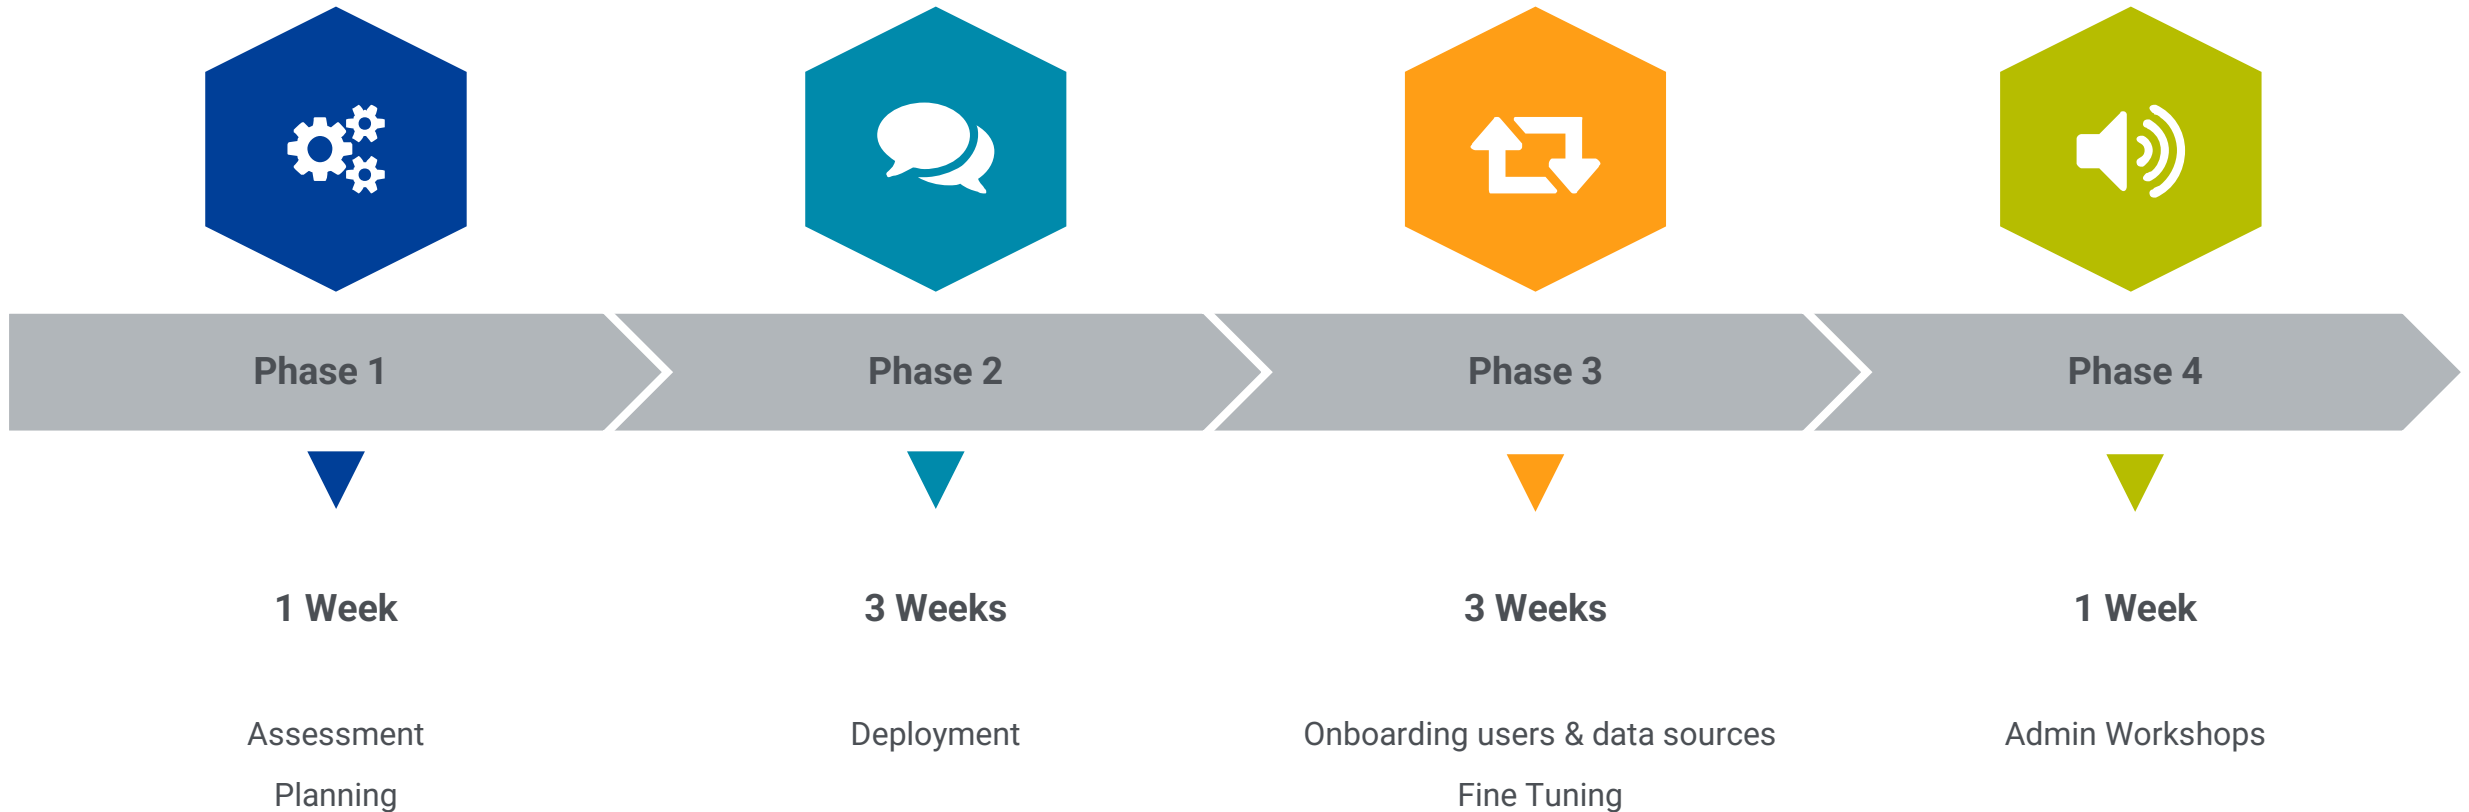

Risk and Compliance

Audit.
eDiscovery
Communication Compliance
Compliance Manager

Implementation Plan

Implementation Benefits

Deployment services

Leverage Beyondsoft's global experience for a rapid and smooth implementation of Microsoft Purview Solutions.

Visibility, control and security

Get a clear view of all your data across your environment, classify and protect your sensitive data and manage it securely.

Risk management & compliance

Identify and mitigate data risks and meet regulatory requirements supporting forensic investigations and legal obligations.

Greater business agility

Create a comprehensive view of your data assets across your hybrid data estate and discover the most relevant and reliable data sources for your business needs.

Innovation & value

Optimize your data protection with AI-powered capabilities and cross-platform support while maximizing the business value of your data by making it easily discoverable and understandable.
