# Unlock Your Data

## What we do

Beyondsoft presents an offer that transforms the way organizations interact with their data. The "Unlock your Data" program is designed to empower companies to extract valuable insights from their databases through a well-structured and enriched data lake, leveraging the power of Azure Fabric and Azure Purview. This solution enables the creation of a solid foundation for AI solutions capable of revealing strategic insights, optimizing operations, and inspiring decisions that create lasting value for organizations and people

### Data Source Mapping and AI Strategy

We analyzed the data sources, prioritized critical domains, and defined the strategy for integration with Microsoft Fabric, ensuring quality and governance.

### Implementation and Integration

We execute the implementation plan, consuming data sources, developing the analytics platform, and providing a service layer (PowerBI).

### Validation and Go-Live

We perform complete tests and validate the solution with data owner

### Development of Conversational Agents

Depending on the data structure, we developed a demo of conversational agents using your data.

Flexible and customized program, tailored to each client's needs.

# Benefits

## **Accelerate the implementation of analytics solutions**

Have a robust data lake enriched with diverse information, enabling AI to deliver strategic insights, operational efficiency, and greater value for the organization and stakeholders.

## **Open Platform**

PaaS solution using an open market solution, with a simplified contracting format

## **Security and reliability**

Always keep your environment safe and stable.

## **Democratization and New Channels**

Integrate with bots and channels, enabling A2A and expanding interaction. Enhance the search capabilities of your solutions..

## **Accelerated and Decisive Decision-Making**

Managers access direct and timely insights, accelerating confident and well-informed decisions.
