

Introducing PreCrime™ Guarantee

BforeAI is partnering with Munich Re to provide our customers with ten times the peace of mind.

There is a lot of talk in the cybersecurity industry about “silver bullet” solutions and “single pane of glass” dashboards. Is it just marketing? Maybe.

At BforeAI, we believe in cutting back on the buzzwords and delivering a product experience that does what we say it will do. **Our PreCrime™ platform uses behavioral AI to shift cyber defense from reactive to preemptive. With solutions for brand protection and attack intelligence, BforeAI is the industry’s fastest, most accurate automated online fraud protection, with a false positive rate of only 0.05%.**

So how do our customers know that we live up to our promise?

Introducing PreCrime™ Guarantee: If our solution fails and it allows a successful attack, we will reimburse your losses - 10x your service contract!

This isn’t an insurance policy, it’s our way of telling you we’re confident in our platform.

By the way, the largest cyber insurer on the planet, Munich Re, is confident too. That’s why they are backing our Guarantee.

We’re putting our money where our mouth is.

”
We were already a very satisfied client of BforeAI and their PreCrime platform, having avoided multiple attacks thanks to their predictive and preemptive solution over the past two years. The Guarantee program offers additional leverage when allocating the budget. Having this safeguard in place helps ensure that our cyber insurance premium will also stay manageable.

~ Gal Messinger, Chief Security Officer, Signify

How it works:

- 1 You become a BforeAI customer.
- 2 You do your thing, we predict and preempt attacks: business as usual.
- 3 If you are impacted by a cyberattack due to a failure by BforeAI's predictive solution, you submit proof of loss from the incident.
- 4 Munich Re and BforeAI reimburse you up to 10x your service contract value.

Seriously. It's that simple.
