

COMPLIANCE YOU CAN RELY ON

Innovative process

Our methodology allows the generation of continuous evidence and the identification of gaps with respect to the risks inherent to the company's line of business.

Continuous auditing by an expert team

We have a multidisciplinary team of compliance lawyers and auditors who audit and evaluate all controls at least once a year.

Data Integrity with Blockchain

The evidence generated is sealed in Blockchain, which ensures its integrity, in addition to having international recognition, allowing the company to demonstrate its compliance to any entity.

Measuring the Effectiveness of Compliance Programs

Comply Pulse ensures that compliance programs work, measuring their effectiveness and allowing the compliance officer and top management to **visualize and correct gaps, generating evidence in blockchain**, that protects the company and improves the bottom line.
