Manufacturing: Maximize automation, Minimize manual process

Integrating EDI with Microsoft Dynamics 365 streamlines order management to response to customers faster and higher productivity, while saving time and money.

CHALLENGES

Companies face a problem of people shortage and human error. It is timely and costly to in-put order manually. Their customers cannot wait!

IDEAL SOLUTION

Automatically, EDI-Sales interchange order between a vendor and a customer. The routine and manual data entry must be got rid off. The shipment must be accelerated.

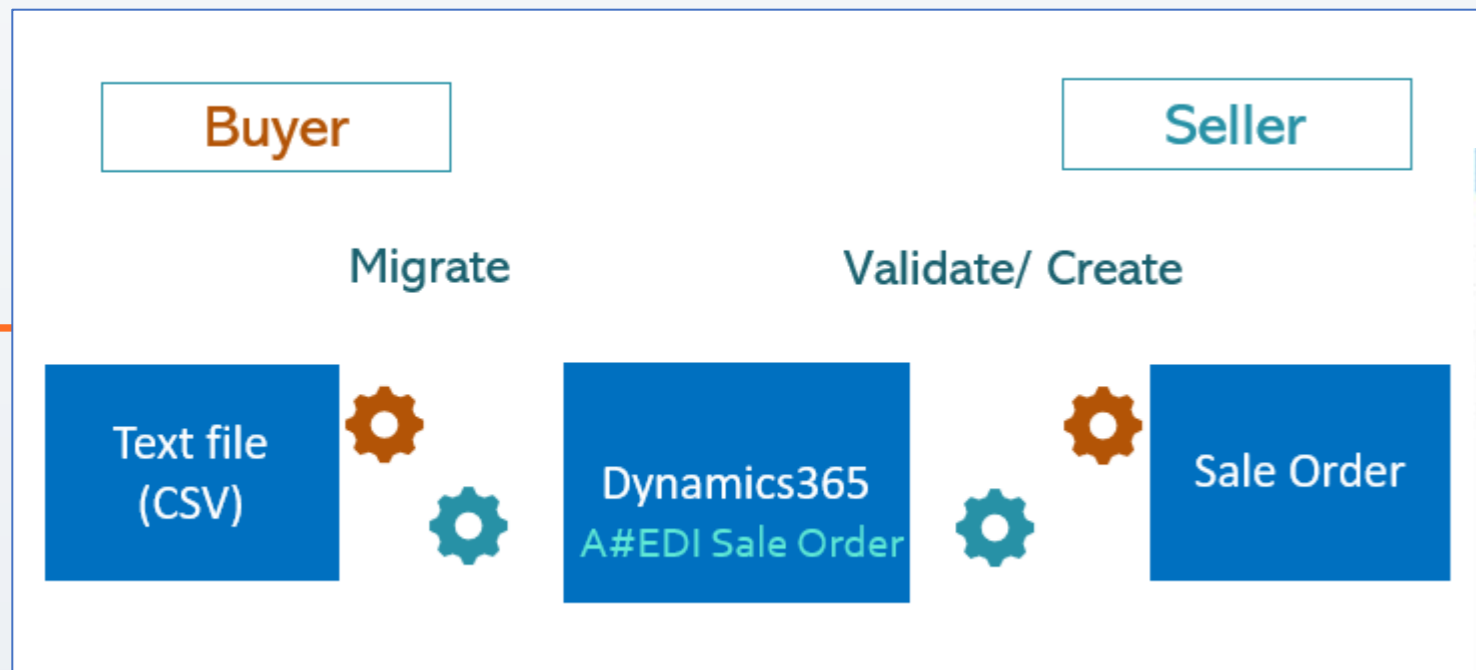

DESIRED OUTCOMES

Order is automated managed by data interchange, no need to input manually. Furthermore, order interchange can be set up schedule or running 24x7. A vendor and a customer get notice of order, shipping, receiving, and invoice. A shipment is always on time.

A#EDI Sale Order & Forecast

A#EDI Sale Order & Forecast facilitates data exchange of sales, purchase, and forecast. It helps increase business opportunities through fewer errors in data, reduced processing delays, minimized unproductive time, also reduce inventory, and save cost.

The screenshots show the Dynamics 365 Finance and Operations interface for the 'Interface Sales Order' (862). The top screenshot shows the 'Import data' button highlighted in the ribbon. A 'Select a file' dialog box is open, showing a 'Browse' button. The middle screenshot shows a file explorer window displaying a folder named 'Interface FORD' on the desktop, containing files like '20210621' and 'Test'. The bottom screenshot shows the 'Create (FORD)' button highlighted in the ribbon, with a 'Confirm create sales oder?' dialog box overlaid, featuring 'Yes' and 'No' buttons. The background shows a table with columns for Line Num, Interchange, Message Ref., and other details.

Bhatara Progress Co., Ltd.

A#EDI Sale Order & Forecast & Microsoft Dynamics 365 SCM

A#EDI Sale Order & Forecast facilitates data exchange of sales, purchase, and forecast. It helps increase business opportunities through fewer errors in data, reduced processing delays, minimized unproductive time, also reduce inventory, and save cost.

Efficiency

Automatically, EDI-Sales interchange order between a vendor and a customer. The routine and manual data entry will be got rid off.

Shipment Improvement

Order data interchange is managed automatically by scheduling or running 24x7, so you can see that your shipment performances are much more improved.

Performance

A#EDI continues to prove its major business value by lowering costs, improving speed, accuracy and business efficiency.
