Manufacturing: Zero human error & Traceability Inventory management

To maximize efficiency, to minimum wastage, the A#QR will enhance the seamless entire process from receiving, picking, shipping to consumers. It offers a ZERO human error and traceability.

CHALLENGES

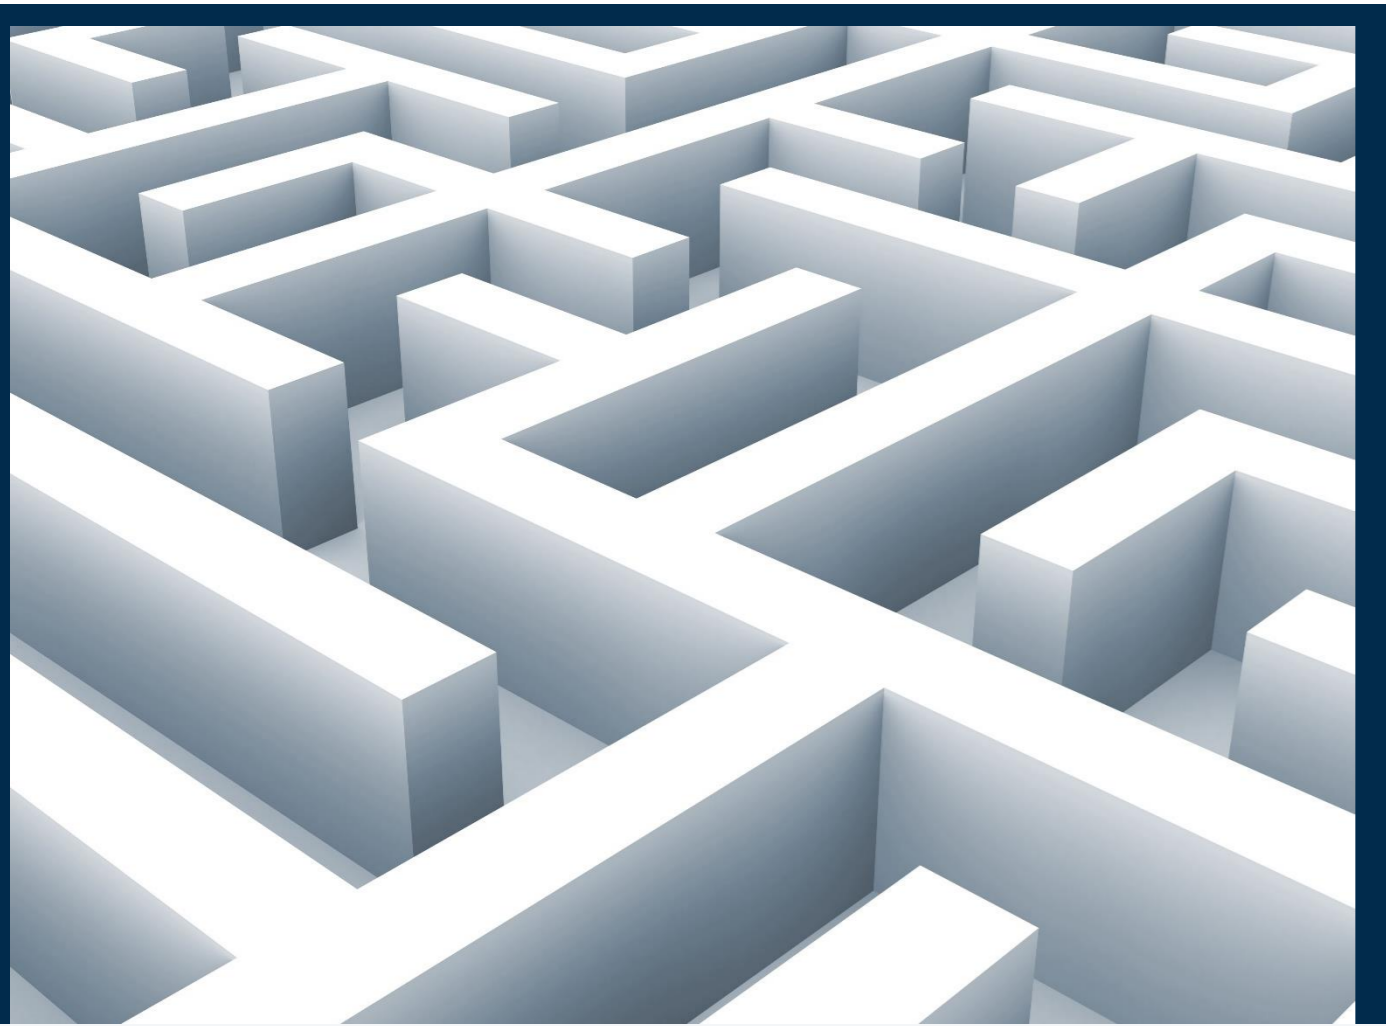

Inventory changes many times a day, a manual process causes many problems ex. no updated and accurate data, stock difference and loss, untraceability and invisibility in a warehouse, etc.

IDEAL SOLUTION

A#QR benefits the manufacturer unlock bundle and shortage stock through automated item identification, counting, traceability, and visibility across multi-warehouse.

DESIRED OUTCOMES

The manufacturer can find and track across multi-warehouse, also receive a right stock faster. They get real time visibility which helps them manage stock, sales, purchase, and shipment.

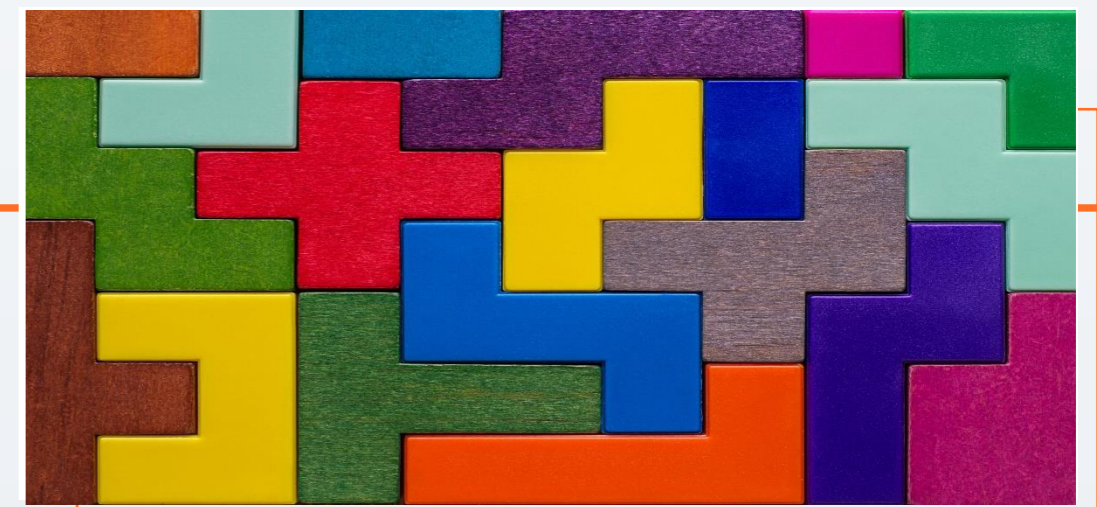

A#QR
