

LESS TIME TO **ACHIEVE MORE** WITH DATA

sign-on process.

BIA REPORTING

What solutions does it provide?

The End Of:

- Multiple Platforms And Logins
- Multiple Licenses And High Usage Costs
- Mutiple Communication Channels, Teams
 And Generated Files

Through:

- Quick Access
- Reporting Viewer
- Single Sign-On Process
 - Smart Search
 - Favorite Reports
- Smart Search

- Team Collaboration Tools
- Notifications System
- Auditing Tools
- Management Tools
- Personalization Tools

 \bigcirc

QUICK ACCESS

All Bl information delivered from a single location, with a single user interface.

Logging into different platforms, working with multiple reports and teams takes time and is inefficient.

Working with multiple software programs generates a large amount of data. Keeping track of all KPIs and accessing the most relevant reports becomes a challenge.

BIA REPORTING Achieve More With Data

PowerB

COLLABORATION

Data interpretation without context is inefficient and time consuming.

- Centralize all report-related information so that when a new user joins a team, he has access to all document-related information.
- Attach additional files to reports to help the team better understand the data.
- Collaborate in the same report through comments and mentions.

Keeps track of comments, new reports, and report-related information

SHARING

BIA Reporting allows you to securely and consistently share documents with your team.

bı4all

Change the theme so that it matches your company's brand.

Aside from theme customization, you can also select **one of two navigation modes to work in the environment** that best suits you, either **list mode or icons mode.**

ર્જી

SAFE USER MANAGEMENT

Keep your data safe. **BIA Reporting allows you to** decide who has access to what.

BIA Reporting enables you to share a document and folders with specific users while remaining **completely independent** of the source platform.

Access management for company employees and third-party collaborators.

YOU CAN ALSO BENEFIT FROM

Auditing tools for assessing who and how individuals interact with the company's data.

Documents from multiple sources
