

# BIChart

## WE AUTOMATE MIGRATIONS TO POWER BI

BIChart converts Tableau workbooks into Power BI reports, so you can complete your migration faster and cheaper than ever before. Unlike manual migrations, BICart was built with a proprietary AI that transforms formulas, visualizations, and connections consistently. The result is a Power BI project complete with DAX formulas and visuals ready for validation.

### 80% Time Savings

Cut project timelines from months to days.

### Convert Tableau to PBI

High fidelity conversion to native Power BI files.

### Accurate Formulas

Translate formulas to DAX expressions.

## Your Intelligent Migration Tool

BIChart was created to accelerate Business Intelligence platform consolidations while dramatically cutting your costs.

### 1. Profile and Plan

BIChart scans your Tableau repository to create a predictable migration plan.

### 2. Convert

BIChart auto-converts your connections, formulas, visuals, and dashboards.

### 3. Validate

BIChart provides guidance to complete validation, and sign off.
