

Defender Assessment

Big Green IT Defender Assessment

Each Defender project begins with a comprehensive assessment, during which our team evaluates the existing configuration and implementation. Based on this evaluation, we'll provide recommendations to improve security, performance, and scalability.

Assessment

Implement

Optimize

Defender Assessment Objectives:

- Review and comply with Client's security requirements including Microsoft security recommendations.
- Evaluate Client's current Microsoft 365 Defender (limited to specific Microsoft 365 Defender services) configuration and implementation.
- Evaluate Client's current Azure Defender (limited to specific Azure Defender services) configuration and implementation.
- Make recommendations to improve Client's security posture and optimize the total cost of ownership.

Deliverables

Big Green IT will develop, present, and deliver the following as part of this project:

- Completion of milestones as listed.
- Assessment Findings and Recommendations report.
- Optional Execution Document. (additional cost)

\$4,650*

*Price dependent on size of network and amount of devices.

Defender Assessment Milestones

Project Planning

Verify Microsoft 365 licensing and Azure subscription services, establish a Project Plan with issue escalation and resolution, and obtain access to Microsoft 365, Azure, and local infrastructure environments as needed.

Discovery and Assess Microsoft 365 Defender

Conduct a comprehensive assessment of the existing implementations of Microsoft 365 Defender (limited to certain Microsoft 365 Defender services) and Azure Defender (limited to certain Azure Defender services), gather precise data from Client's Microsoft 365 Secure Score and Azure Security Center scores, analyze the data, document the findings, provide an overview of Microsoft 365 and Azure Defender Security services, present highlighted risks and recommendations for improvement.

Discuss and Plan

Identify the highest-priority changes, compile a list of recommendations, and discuss the findings with Client's IT staff.

Project Completion

Review deliverables and acknowledge project completion.
