Microsoft Modern Work Assessment

Big Green IT Microsoft Modern Work Assessment

Each Microsoft Modern Work project begins with a comprehensive assessment, during which our team evaluates the existing environment, and provides recommendations to reduce costs and optimize services.

Assessment | Implement | Optimize

Microsoft Modern Work Assessment Objectives:

- Evaluate the current Microsoft 365 environment.
- Utilize optimum features and services within the Microsoft 365 and reduce the total cost of ownership.
- Utilize Microsoft 365 Secure Score to drive initiative to increase security.
- Utilize Microsoft Purview to ensure industry compliance and data loss prevention.
- Utilize Microsoft Adoptions Score to analyze user adoption and usage.

Deliverables

Big Green IT will develop, present, and deliver the following as part of this project:

- Completion of milestones as listed.
- Assessment Findings and Recommendations report.
- Optional Execution Document. (additional cost)

$4,950*

*Price dependent on size of network and amount of devices.

Microsoft Modern Work Assessment Milestones

Project Planning

Validate M365 licensing, identify stakeholders, create a project plan with issue resolution procedures, and secure access to both Microsoft 365 and local infrastructure environments as needed.

Discovery and Assessment

Perform a comprehensive assessment of the Client's local, and Microsoft 365 environments, including Microsoft 365 services, data collection, analysis, documentation, presentation of the current Microsoft 365 state, identification of risks, provision of improvement recommendations, and the development of a remediation plan when necessary.

Findings and Discovery

Prioritize essential changes and formulate recommendations, discuss findings with the Client's IT team.

Project Completion

Review deliverables and confirm project completion.
