

Modernize your phone system with Microsoft Teams Phone

Did you know you can use Microsoft Teams Phone to replace your existing phone system?

Microsoft Teams Phone makes it easy for organizations of any size to turn Microsoft Teams into a powerful and flexible phone system. If you are considering replacing your legacy in-house phone system (PBX), that can be costly and complex to manage, Teams Phone is an excellent solution.

Many companies hold off and changing their phone systems because it can feel daunting. With Microsoft Teams Phone, the process to move, manage and add to your phone system is simple and quick, and the advantages are great.

Benefits of Microsoft Teams Phone

- Teams Phone is Integrated into the Microsoft Teams Platform.
- Simple set up and management.
- No need to change phone numbers. It is easy to port them over to Teams Phone.
- Great for growing companies. Purchasing additional licenses is quick and simple.
- Available on desktop phones, mobile devices, computers, headsets, conference phones.
- Advanced feature set including call forwarding, call queues, voicemail, call transferring, auto attendant, office hours, call park, call block, call delegation, and more.

Licensing Information

Microsoft Teams Phone System + Calling Plan is available for any “core” Microsoft license (ex. Microsoft 365 Business Standard, Office 365 E3, etc.)
