10 offices worldwide

Poland, India, Malaysia, Canada

**We take IT
outsourcing to
the next level.**

How we work

- Billennium Competence Centers.
- Distributed, global structure providing access to thousands of IT specialists.
- Methodology and tools for remote working.
- Competent recruitment department (two specialized teams, over 20 experts in 7 locations).
- Effective HR operations (CX, EB, HRBP team).
- Continuous human development (internal academies, trainings, career paths, mentoring).
- Cooperation with universities (influence on curriculum, lecturers, student internships, research projects).
- Continuous monitoring and adaptation to the employees' needs (modern offices and work tools).

Why Competence Centers?

Competence Centers are a perfect solution for our clients. We define them as a comprehensive skill set in an area relevant to the client to answer all their business needs.

Why are the Competence Centers working well?

- People with various skills are in the same Center so they can together deliver the best service.
- The Centers are located not only in the biggest and the most expensive cities but in the towns with extensive academic background.
- We don't need to recruit specialists to answer your needs – they are already waiting for you!
- As our client, you will have a dedicated Service Delivery Manager.
- [Learn more about Competence Centers on our website!](#)

Gold Competences

- Cloud Platform
- Cloud Productivity
- Application Development
- Application Integration
- Data Analytics
- Datacenter
- Collaboration and Content

Silver Competences

- Security
- DevOps

IT Outsourcing with us

We offer flexible models of outsourcing services (People, Teams, Managed Services), which can be combined and configured to meet specific demands.

We work in the majority of technologies and our recruiters can do magic when finding the right people, even with niche skills.

We provide our services based on the SLA model (Service Level Agreement), both on-site and off-site.

1000+

IT specialists
on board

Managed Services

Step up to a higher level of IT outsourcing.

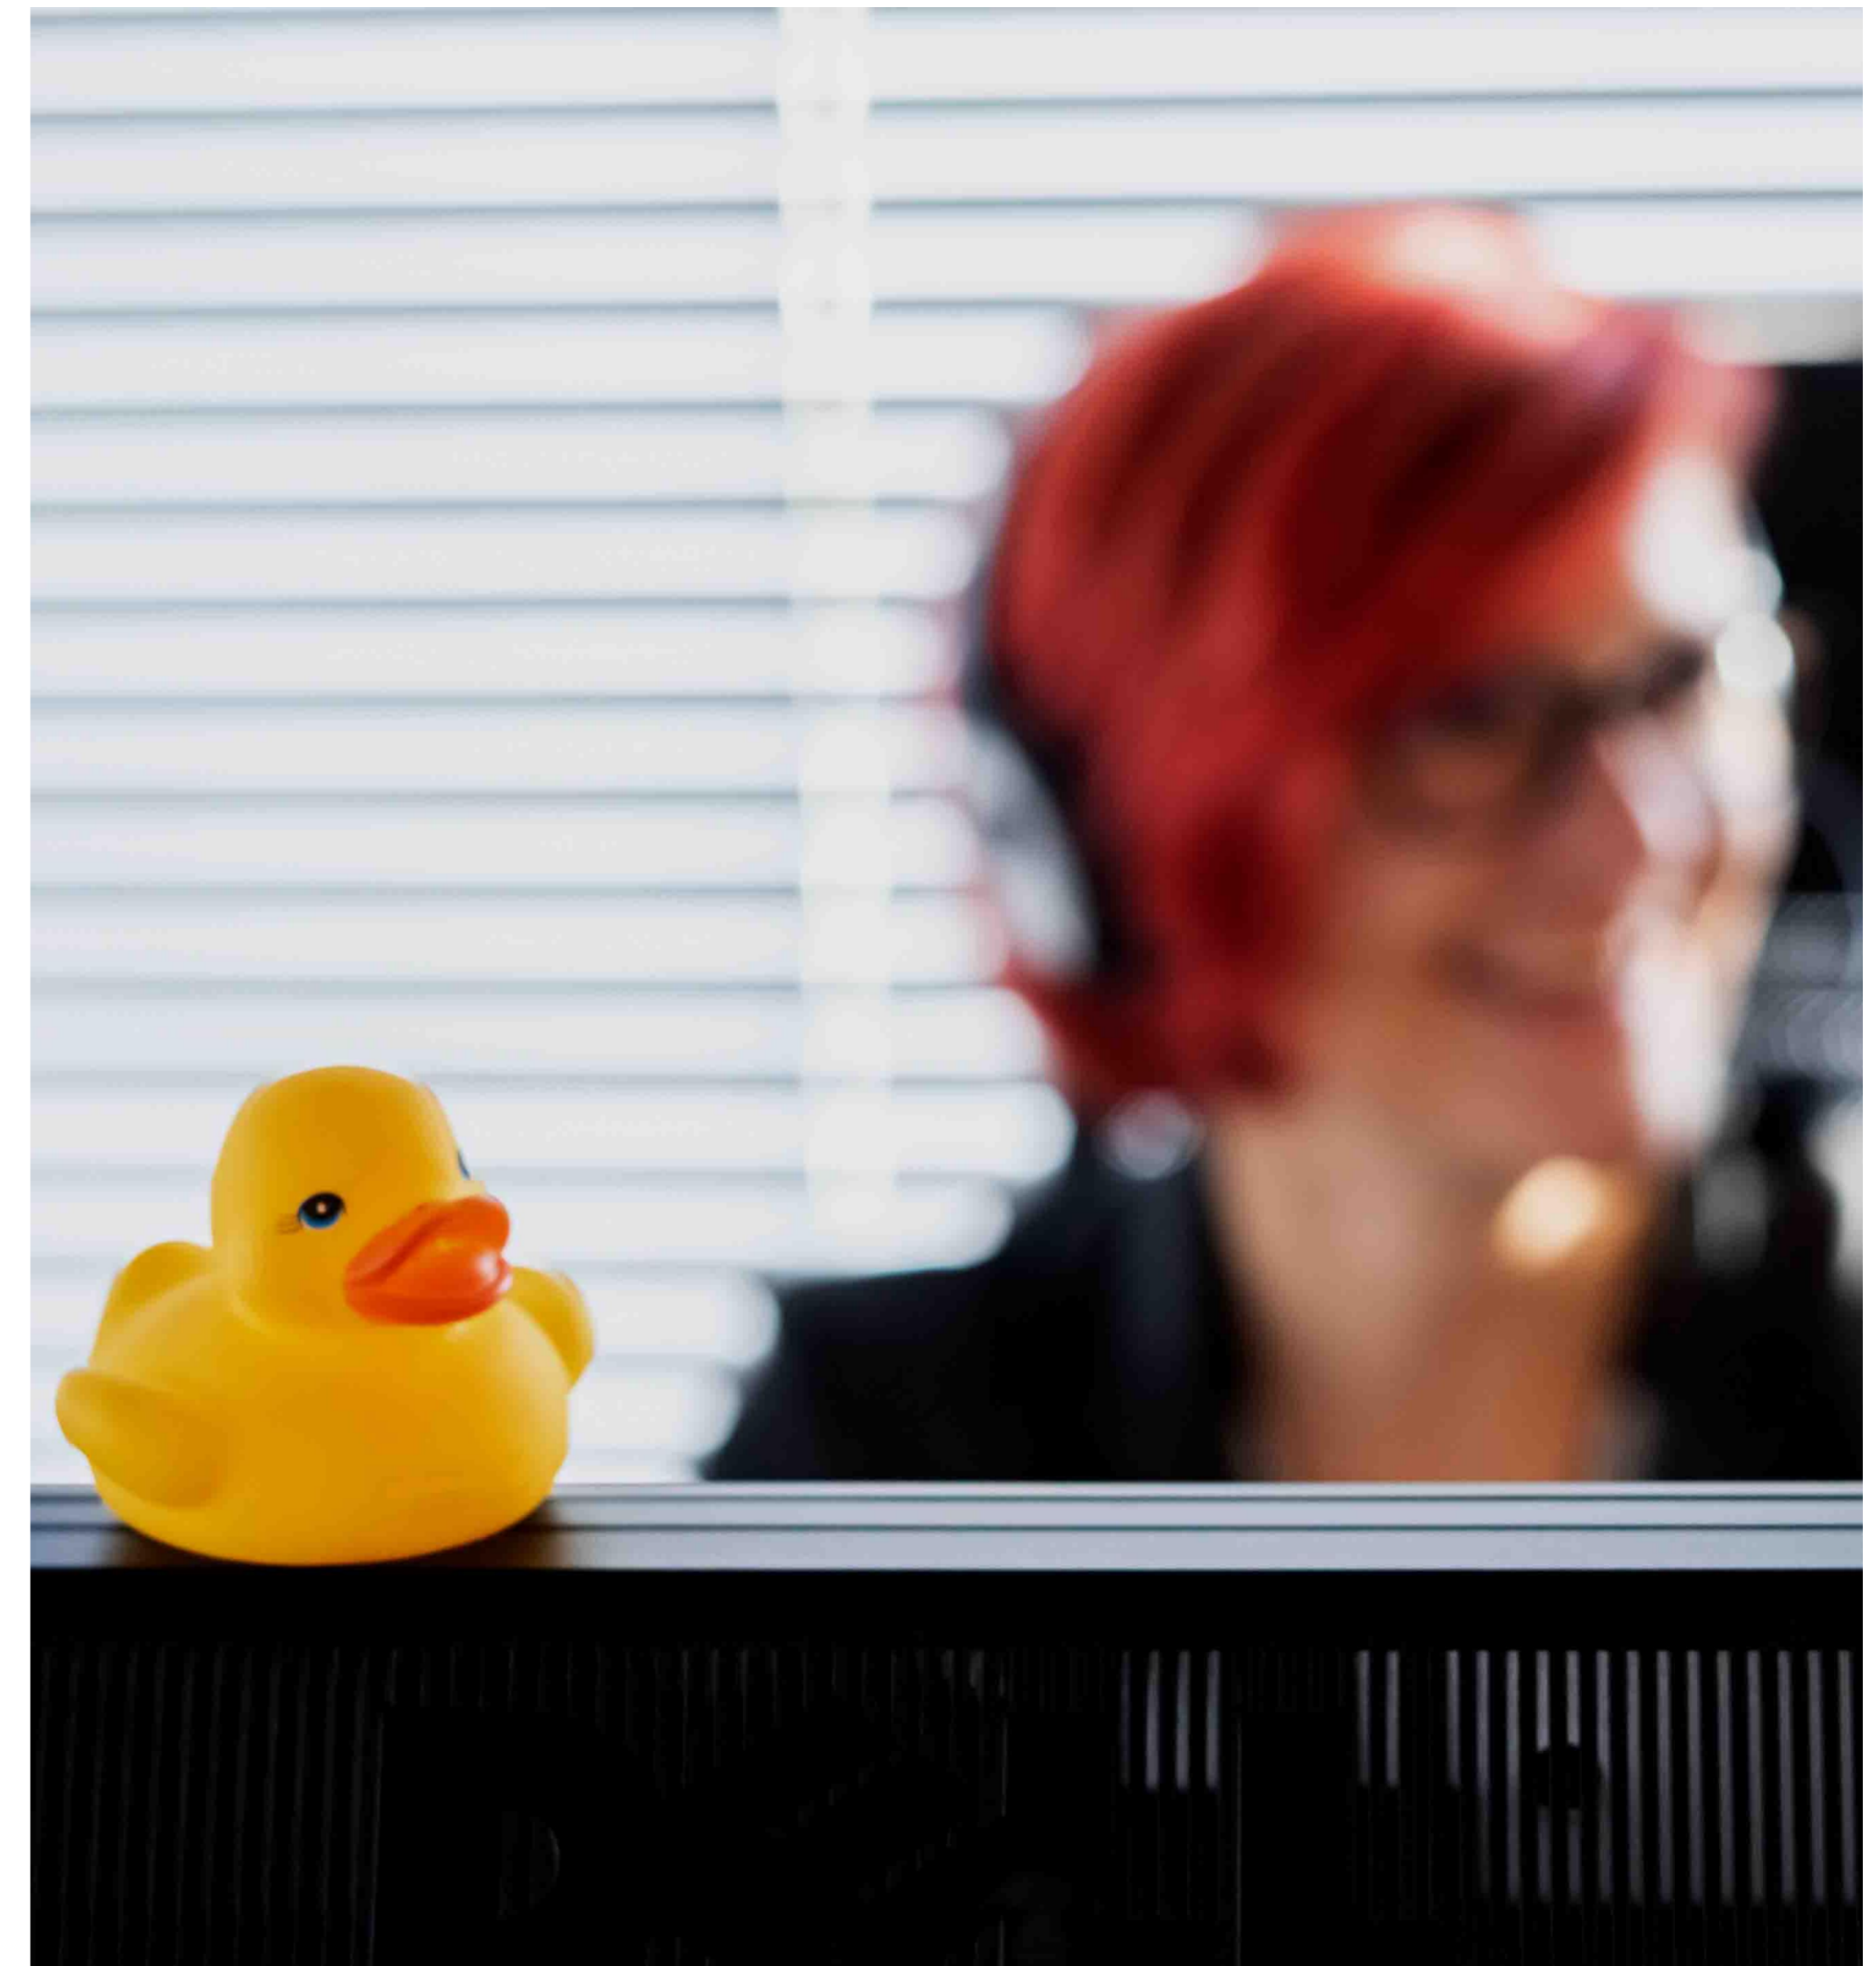

Work with us in the managed services model and take the burden of caring for the process off your shoulders.

Managed services are an ideal solution when you would like to take care of a separate area – service, applications etc. Then we take over responsibility for the whole area together with active participation in its development in accordance with the strategy agreed with you.

We are not only IT specialists – we will be a consultant available for you during our whole cooperation.

Our skills

Programming languages	C#, Java, Javascript, PHP, Python, Kotlin, R, Objective-C, T-SQL, PL-SQL.
Technologies	.NET, SharePoint, Azure, PEGA, TIBCO BW Suite, Salesforce, MuleSoft, JBoss Data Virtualization, AWS, RPA, Service Now, WebMethods, Hadoop, Solr/ Spark.
BI – Business Intelligence	Tableau, PowerBI, Spotfire, SSRS, SAP BO, SAP CLM.
Database	MS SQL, Oracle DB.
Mobile	Android, iOS, Xamarin.

Our mission

In Billennium, we believe that we can change the world through people and environment-friendly IT solutions.

And that's why it is our mission:

With passion, we cross the boundaries creating innovative IT solutions that bring joy and benefits to the clients and ourselves.

Our values

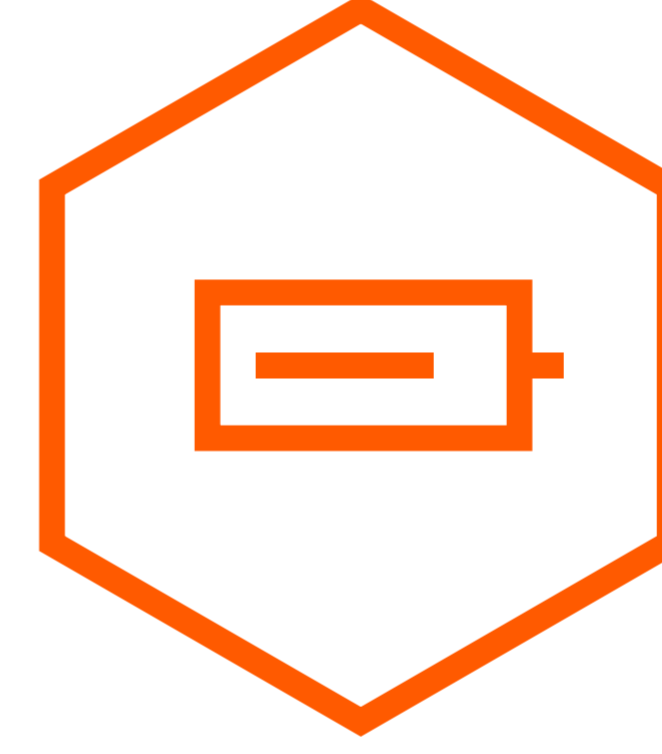

Trust

Innovation

Growth

Energy

Responsibility

Let us help you

grow your

business.
