

## Save time and simplify document deliveries

Reduce your document processing times and paper costs with eMailer Manager. Tailored to integrate seamlessly with Dynamics 365 Business Central, it empowers you to efficiently deliver essential documents to customers, employees, and vendors via email or fax in bulk. Achieve heightened efficiency without compromising document security.

Improve customer responsiveness and accelerate transactions with reduced turnaround. Simplify your processes with single batch deliveries of documents by email or fax across departments.

Automatically converts files to PDF format and stores them locally before you send documents out. By enabling you to send thousands of documents at a time, eMailer Manager radically reduces your document processing costs.

## Optimize your company's performance

Integrates with Outlook and SMTP mailers, and uses Adobe PDF, novaPDF, SRS and Crystal Reports formats.

Reduce document delivery times through batch deliveries with automatic attachments.

Send posted and unposted documents, and assign multiple email address IDs per email.

Customize your message templates, review archived documents, and even attach picking tickets and packing slips.
