

Data Strategy & Modernization 2-week Assessment

ABOUT BINOMICS:

We are a Microsoft Gold Data Analytics and Data Platform partner working with companies of all sizes and industries helping them generate knowledge from their business data.

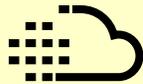

Our 2-week assessment provides invaluable knowledge to organizations not only regarding data modernization best practices available but also in terms of their own maturity level and possible action plans to implement a consistent digital transformation strategy within their capabilities.

WHAT WE OFFER

Comprehensive analysis of your existing technological and strategic data landscape that provides the knowledge and action plans needed to become a data-driven company and embrace the digital transformation.

This engagement follows an agnostic approach in the analysis, general result, and action plan while leveraging the full Azure data platform to demonstrate the best practices in data strategy and modernization. It also proposes further implementation roadmaps either in hybrid or full Azure setups.

Discover how you are meeting the industry best practices and how to face the challenges of a world increasingly governed by the efficient use of data. Our proposal is focused on understanding your reality and needs to later suggest a solution and implementation roadmap tailored to you.

Azure offers a modular and integrated set of. This provides the ability to implement a great number of data modernization strategies. From slow-paced implementations starting with a simple database, to complex and big bang end-to-end modern data platforms. We will introduce you the most suitable alternatives for your business.

WHAT OUR CUSTOMERS ARE SAYING

“Binomics helped us greatly to transform our vision around data management and use. The experience and advice they provided allowed us to face our digital transformation roadmap with confidence”

-Juliana Gallego, Project Leader Spain & LATAM, e-Process Group

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

WHY AZURE

Be future-ready

Continuous innovation from Microsoft supports your development today and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise-grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data science tools.

Build on your terms

You have choices. With our commitment to open source and support for all languages and frameworks, you can build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support for Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single identity platform trusted by 90 percent of enterprises globally.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With its \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.
