The Path To Trusted Identity For the Enterprise
Native Biometrics vs BioConnect ID

The Value is in The Platform

A custom-built application must be developed and maintained by the enterprise, resulting in high costs despite the free native biometric. BioConnect ID delivers a lower cost of ownership by providing a standards based plug-and-play platform that allows for Enterprise controlled multi-modal biometric authentication for a true trusted identity.

Your App
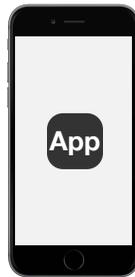

With Native Biometric Authentication

= No Trust

PLUS

In-House Developed Platform

BioConnect ID App

Includes Multi-Modal Biometric Authentication

= Establishes Trust

INCLUDES

BioConnect ID Platform

		In-House Developed Platform	BioConnect ID Platform
