Who are Pixalert

PixAlert's is a content audit solutions provider which protects organisations reputation and user-base through eliminating risk of exposure to illicit & inappropriate images, language and bullying.

PixAlert helps to discover inappropriate and sexual imagery, offensive language and bullying that resides on organisational networks.

Additionally, PixAlert allows organisations to search their network to discover data of a sensitive nature and to manage this data efficiently and effectively to ensure GDPR compliance.

PixAlert products let you scan, index and search your entire network for inappropriate images, languages and bullying

1. Comprehensively search your network

PixAlert's Educational solution scans and indexes your data - letting you comprehensively search your network. Using specific language and contextual indicators our products can detect cases of bullying or distribution of content that is pornographic or illicit in nature.

2. Email Watch - Safeguard against misuse?

PixAlert will alert you to inappropriate use of email on the network. Protecting against misconduct from staff.

3. Content removal

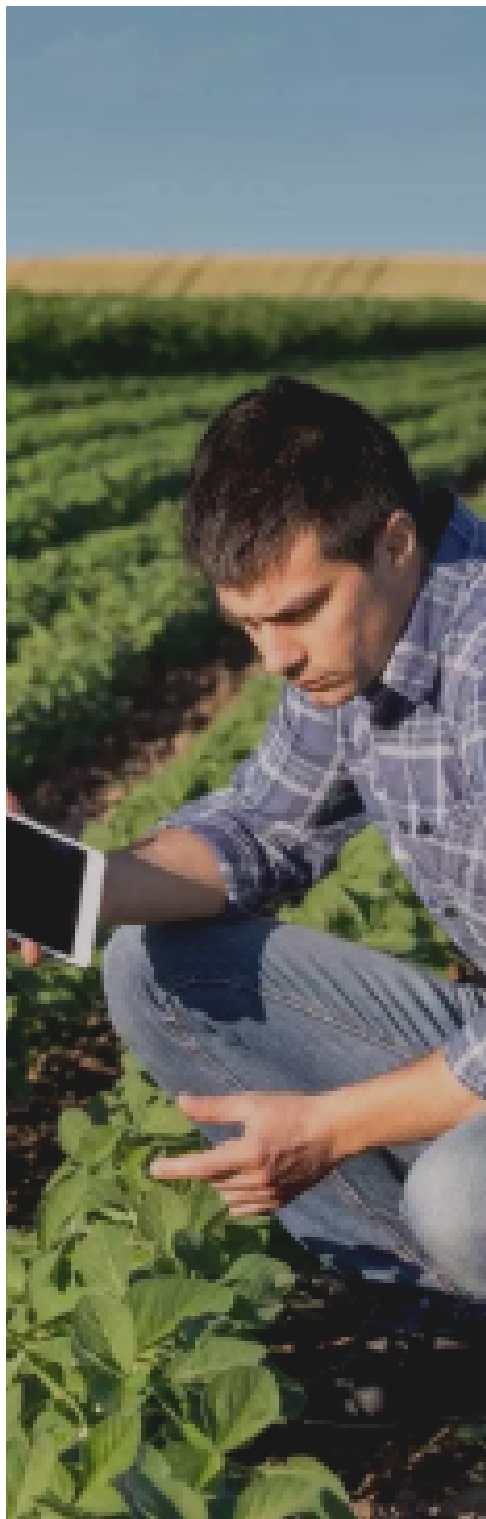

Let PixAlert identify and remove the subject matter. Flag inappropriate data quickly, preventing spread.

4. Monitor devices

PixAlert monitor prevents staff from viewing inappropriate images or data. Receive instant alerts to inappropriate images or content.

Data Discovery & Management

PixAlert GDPR product lets you scan, index and search your entire network.

1. "Google" your network

PixAlert's GDPR solution scans and indexes your data – letting you "Google" your network. Using specific and multiple search criteria to unearth sensitive and unsecured data across the network.

2. Reduce Migration & Cloud Costs

PixAlert software identifies redundant data or data which may be costing money. Reports on when old files were last used lets you make informed decisions on whether data is of value or adding to your cloud costs.

3. Safeguard against email fraud

Do you know staff can edit sent and received emails? If you did, congratulations – you're in the minority. PixAlert will alert you to such edits which may contravene company and regulatory data protection compliance.

4. Automate 'Subject Access & Freedom of Information requests

GDPR requires organisations to provide Data Subject Access Request (DSAR) & Freedom of Information requests (FOI) promptly. PixAlert's will produce a reports in minutes.

5. Run Data Transfer Requests

Another challenge of GDPR is the need to provide members of the public with Data Transfer Requests (DTR). PixAlert produces DTR reports in CSV or XLS formats – in minutes.

6. Manage your retention policies

Retention of old and no longer required data increases risk of data breaches. PixAlert helps you avoid the risk by alerting you.

7. The Right to be forgotten

The "Right To Be Forgotten" is a GDPR task which brings additional pressure on already stretched resources. Let PixAlert identify and remove the appropriate subject matter

8. Inventory of Data

Knowing your data and where it is sounds almost impossible to know. With PixAlert's "Data Auditor" solution you can see and understand the type of data you are responsible for where it's located. Take control and manage the data in your position.
