SharePoint Online Migration Assessment

2-weeks Assessment

Overview of the Offering

Most of the organization are yet to reap out the full potential of the already present SharePoint in M365. We help our customers to plan the Migration from any SharePoint On-Premise environment with detailed assessment and estimate the time and efforts required for Migration.

How it works

- Understand the business problems, challenges and customer pain areas
- Understand SharePoint On-Premises Environment, Farm Architecture
- Perform Tool based assessment using customized PowerShell scripts, templates & SMAT Tool (SharePoint Migration Assessment Tool)
- Application Inventory Analysis to identify parameters that are critical for migration such as number of sites, size, usage, number of InfoPath forms, workflows, web parts, customizations etc.
- Determine unused data – documents, sites, applications etc.
- Logical grouping of sites by department or division
- Recommend strategic migration approach & migration tools
- Provide High level estimated cost and timeline for migration

Key Features

- Accurate planning is critical for success of any migration. This assessment is designed to estimate size and complexity of your migration project.
- It will help you to provide an insight into your SharePoint environment and complexities you need to be aware of
- Develop strategy for migration of existing application portfolio to SharePoint online for business-critical applications
- Define decision tree to determine what should be migrated and what should be considered for clean-up
- Determine estimated cost and timeline required for migration for IT budget approval
