Microsoft COE starter toolkit setup and configuration 2. Reusable components setup- such as header, footer, common components 3. "App In A Day" workshops - 4 4. Training to identified power users 5. Certification program tailored to your organization

Low Code No Code Factory

Power Platform COE Setup & Governance

Birlasoft's Centre of Excellence (COE) nurtures the enterprise business digitalization and process automation, acting as a central-function breaking the organization silos. A powerful approach for an organization to align around business goals rather than individual metrics.

- Power Platform COE setup in 7 weeks
- Ready to go Intake forms and Governance Apps

Application Modernization

Transform & Modernize legacy applications to Power Platform Low Code No Code tech stack with faster & secured development and deployment framework. Migrate your legacy InfoPath/Nintex/HCL Domino Apps/SharePoint Designer Workflows to Power Platform.

Pay as you Go – Support & Enhancement

Power Platform support & enhancements, continuous improvements. Flexible options to choose the support model based on the requirement.
.

Incident Management   Service Request   Change Management   Enhancements

ERP Surround – Integrated Apps

Surface crucial ERP data on top of MS Teams to realize the true potential of M365 investments and enhance collaboration. Employees don't need to navigate to ERP to action important processes or approvals, thus providing a single-window for actions on data, enabling faster decisions and improved productivity.

- 1-week free assessment to understand use cases
- High Level implementation plan for the identified use cases
