

AI Query by Bismart

Are you facing any of these situations?

- Non-technical users rely on IT to access information and query data.
- Data analytics and queries are too time-consuming.
- The exposure of sensitive data raises privacy concerns.

Query your databases in natural language

Answer your business questions in real-time, accelerating decision-making

Get answers to your queries directly on the platform or export them to Power BI

Sensitive data never leaves your Azure environment

AI Query's Technical Features

Integrated and 100% Compatible with Azure

Designed to work seamlessly within the Azure ecosystem, ensuring smooth integration with your existing systems.

Available on Azure Marketplace

Access AI Query directly from Azure Marketplace for easy implementation.

Full Management of Your Databases

Structure your databases by themes and ask questions based on business areas or topics.

Deployable in Your Own Tenant

AI Query is deployed in your Azure tenant, ensuring complete control over the tool and your data.

User Authentication

Ensures secure user management through Microsoft Entra ID, reinforcing privacy and controlled access.

Easy Installation and Deployment

Simple implementation and adaptation to any existing infrastructure.

Discover everything you can do with AI Query [here](#).
