On Demand Webinar Microsoft Azure Cloud

There are many reasons why transforming your data center to the cloud is worthwhile. Benefit from modern technology and flexible capacity expansion with Microsoft Azure Cloud. In the On Demand Webinar from BitHawk, you will learn how Microsoft Azure Cloud scores with high security requirements and transparent prices.

Webinar Part 1

Do you know the services of BitHawk? Tobias Stöckli (Head of Key Account Management) gives you a brief introduction to the company. Find out in which areas we can support you professionally.

Webinar Part 2

Afterwards, David Meier (Teamleader Microsoft Cloud, BitHawk AG) will take over. He will give you exciting insights into what the optimal path to the cloud can look like.

When migrating to the cloud, arguments such as: Flexibility for your company and quick reaction to new requirements. Costs are not the main reason for transformation to the cloud for many companies. Nevertheless, these are of importance, because no one wants oversized environments.

With Microsoft Azure Cloud you migrate your data center with high security requirements. BitHawk customers benefit from the strategic partnership with Microsoft and other strengths such as:

- Various customer experiences and references
- The 12x gold expertise
- Managed Service Provider/Outsourcer
- BitHawk not only knows the technology - but also the processes.
- Suitable for hybrid solutions

The On Demand Webinar will provide you with possible migration strategies and migration scenarios.
