

Increase your security maturity level

The Active Directory is constantly growing and changing with the company. Therefore, it is essential to perform regular security audits. The Active Directory Security Assessment gives you an overview of the security level and provides you with suggestions on how to increase your maturity level.

BitHawk AG accompanies them in the Active Directory Security Assessment in 3 phases.

Active Directory Security Assessment (Cloud & On-Premis)

Phase 1: Analyse	Approximately 40 checkpoints in the Active Directory are analyzed.
Phase 2: Recommended measures	<p>The measures include the following areas from the analysis:</p> <p>Active Directory</p> <ul style="list-style-type: none">• Forest / Domain Topology• Active Directory Site and Services• Active Directory Objekte• Active Directory Domains and Trusts• Active Directory Users and Computers <p>Azure Active Directory</p> <ul style="list-style-type: none">• Review basic setup• Admin Accounts und Settings• Logins & Audits• Legacy Protokolle & AAD Join
Phase 3: Implementation measures
