

BitRecover Shared Mailbox Duplicate Remover

Delete Duplicate Emails from Shared Mailbox

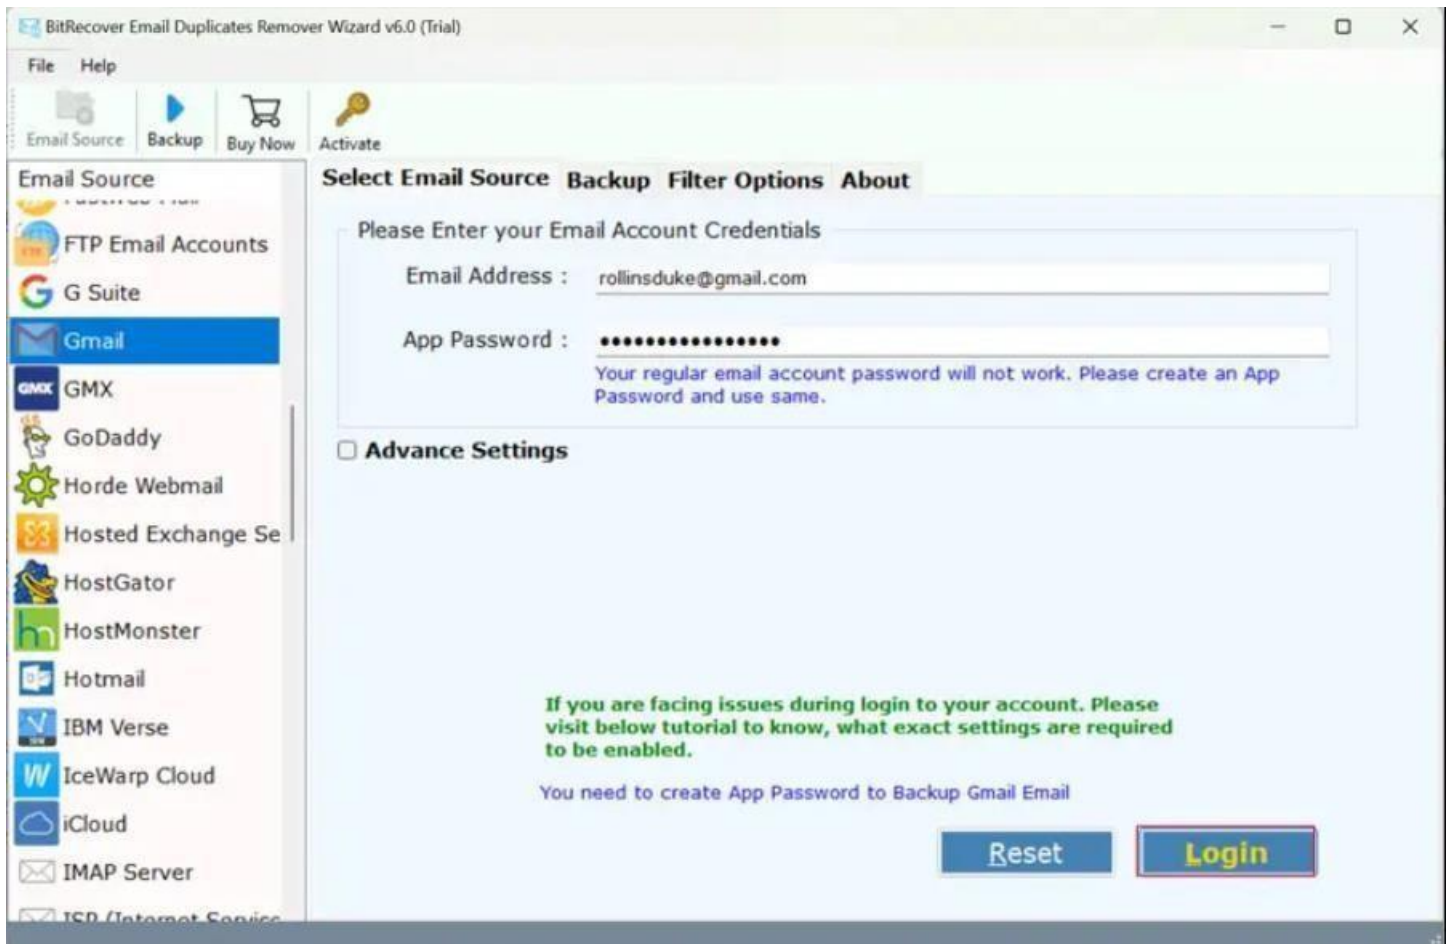

Managing an extensive collection of emails can become challenging when duplicates accumulate, leading to increased storage usage and potential confusion. This is where the Shared Mailbox Duplicate Remover comes into play, which basically offers a reliable solution for eliminating duplicate emails from various email accounts and services. It supports multiple formats and services, ensuring seamless deduplication and better email management.

Visit the official page: Shared Mailbox Duplicate Remover

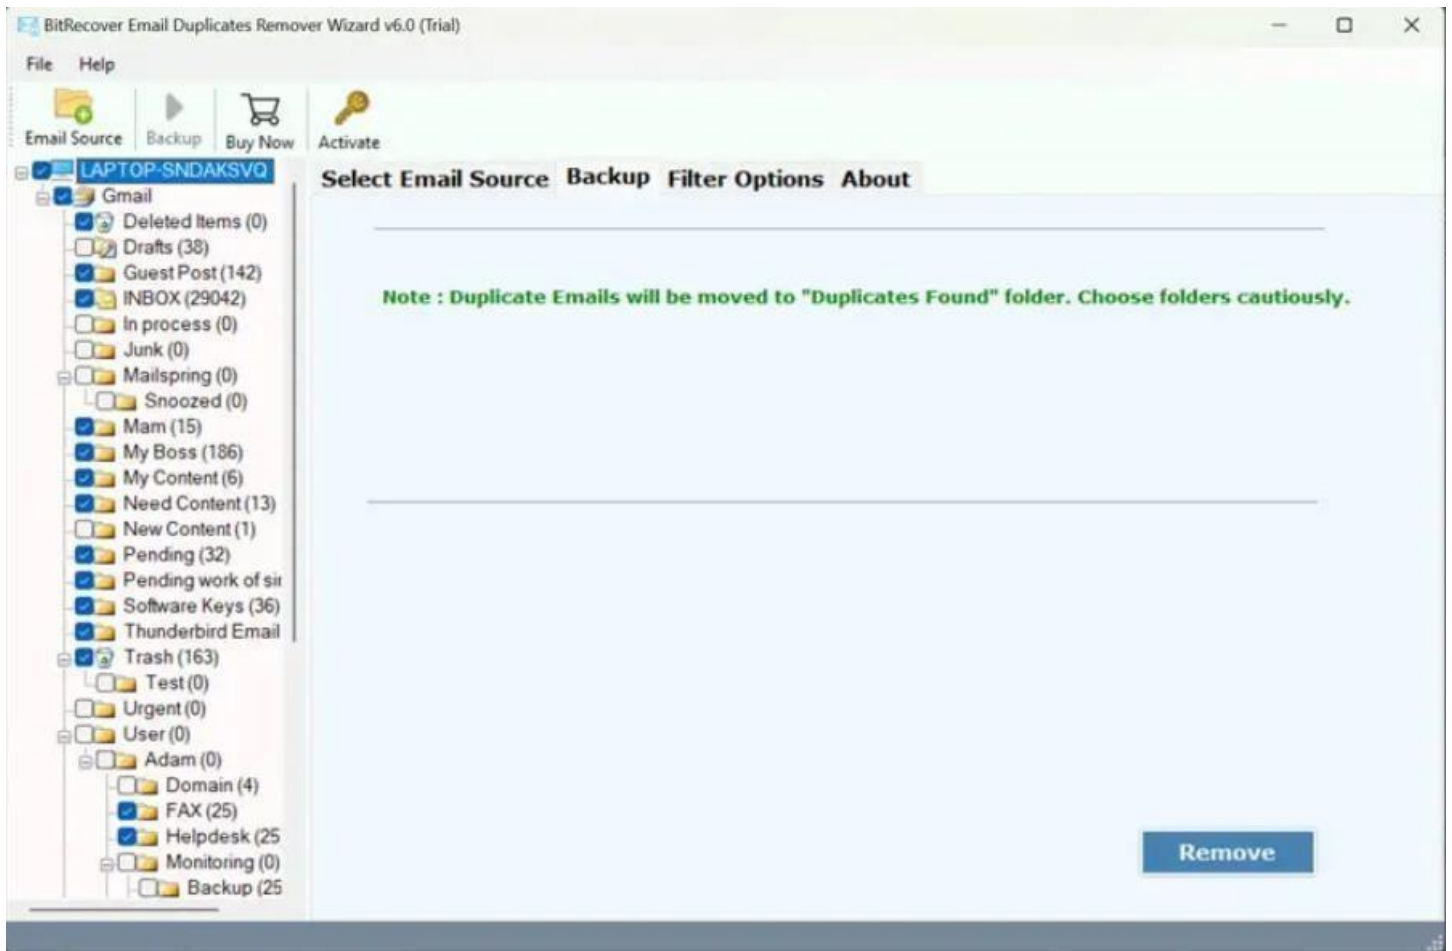

Step 1: Download Shared Mailbox Duplicate Remover and open it. The software displays the list of all Email Source options available. Based on your requirements, choose one of the options.

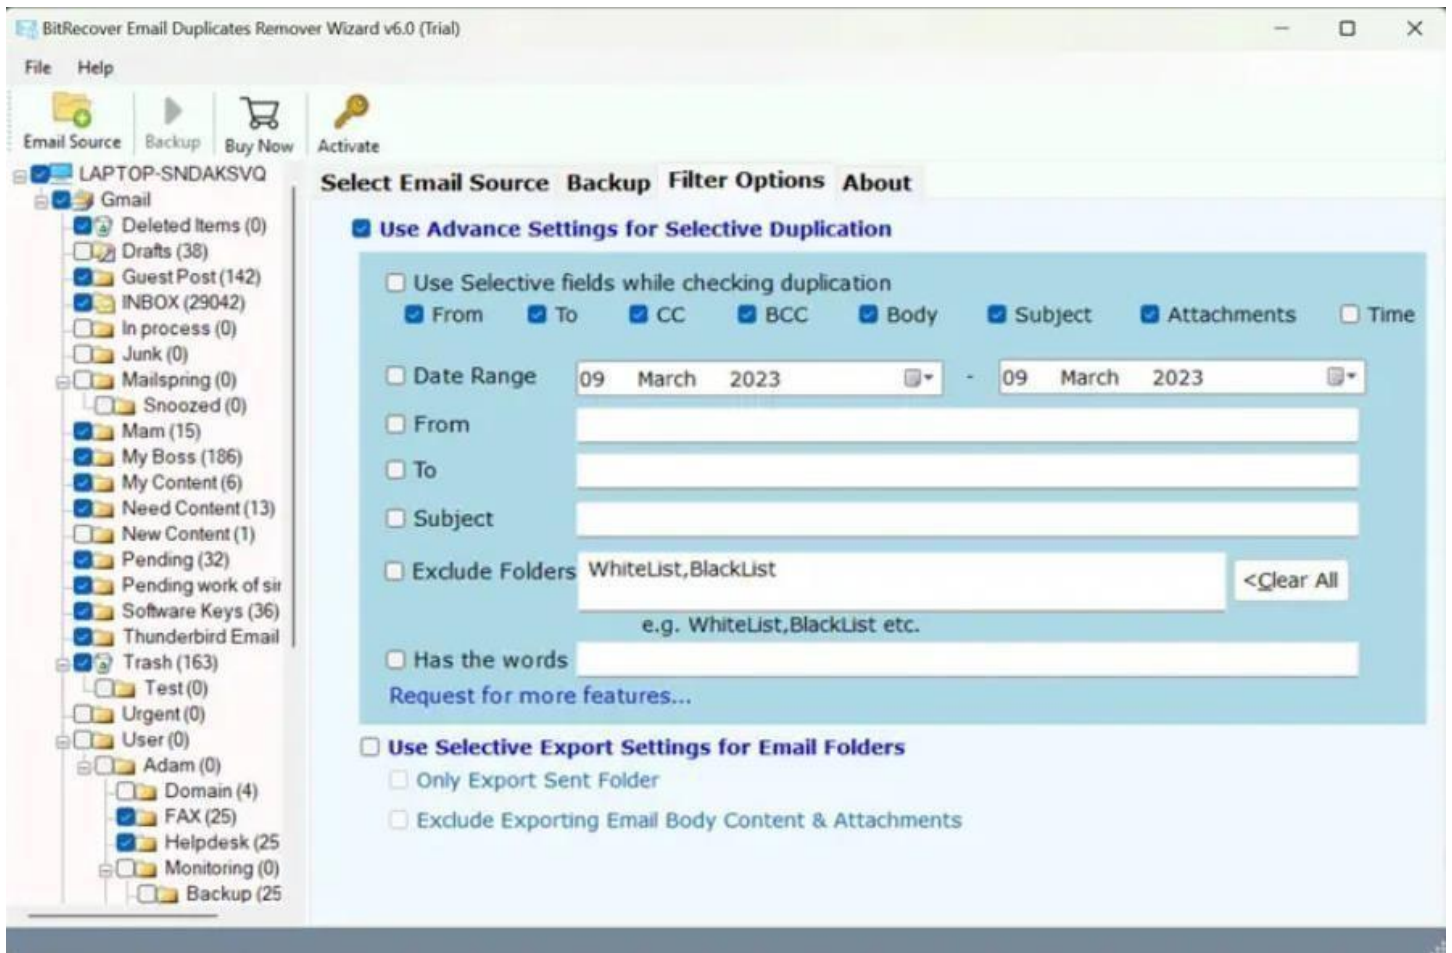

Step 2: The software will ask you for your Email Account Credentials. Fill in the correct credentials and click on the **Login** button.

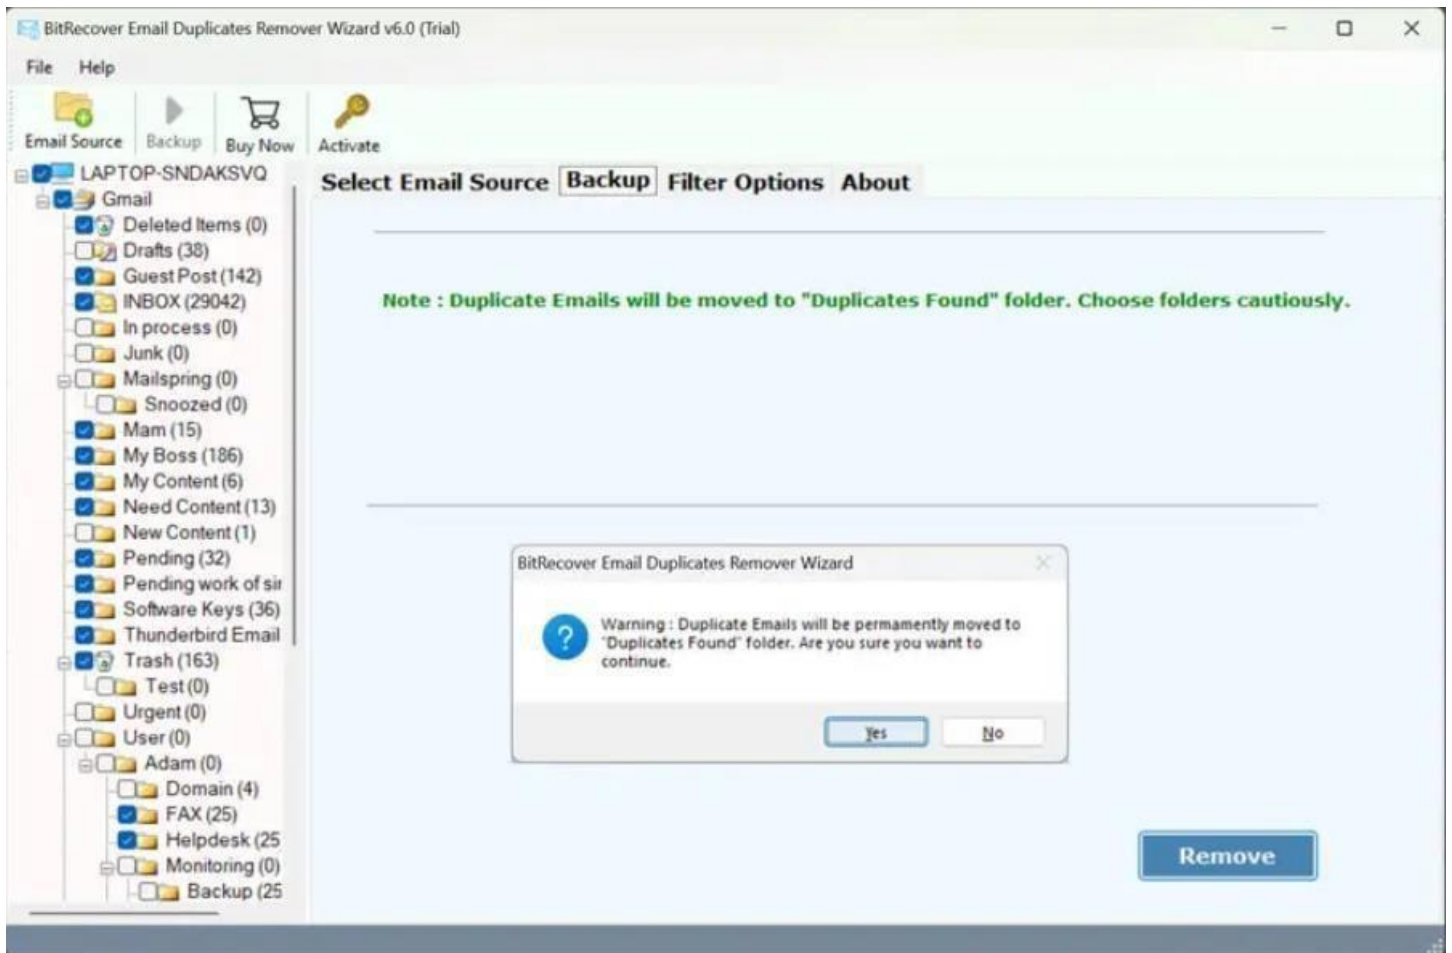

Step 3: The software panel displays all the files/folders present. Tick the required files/folders and then click on the **Remove** button.

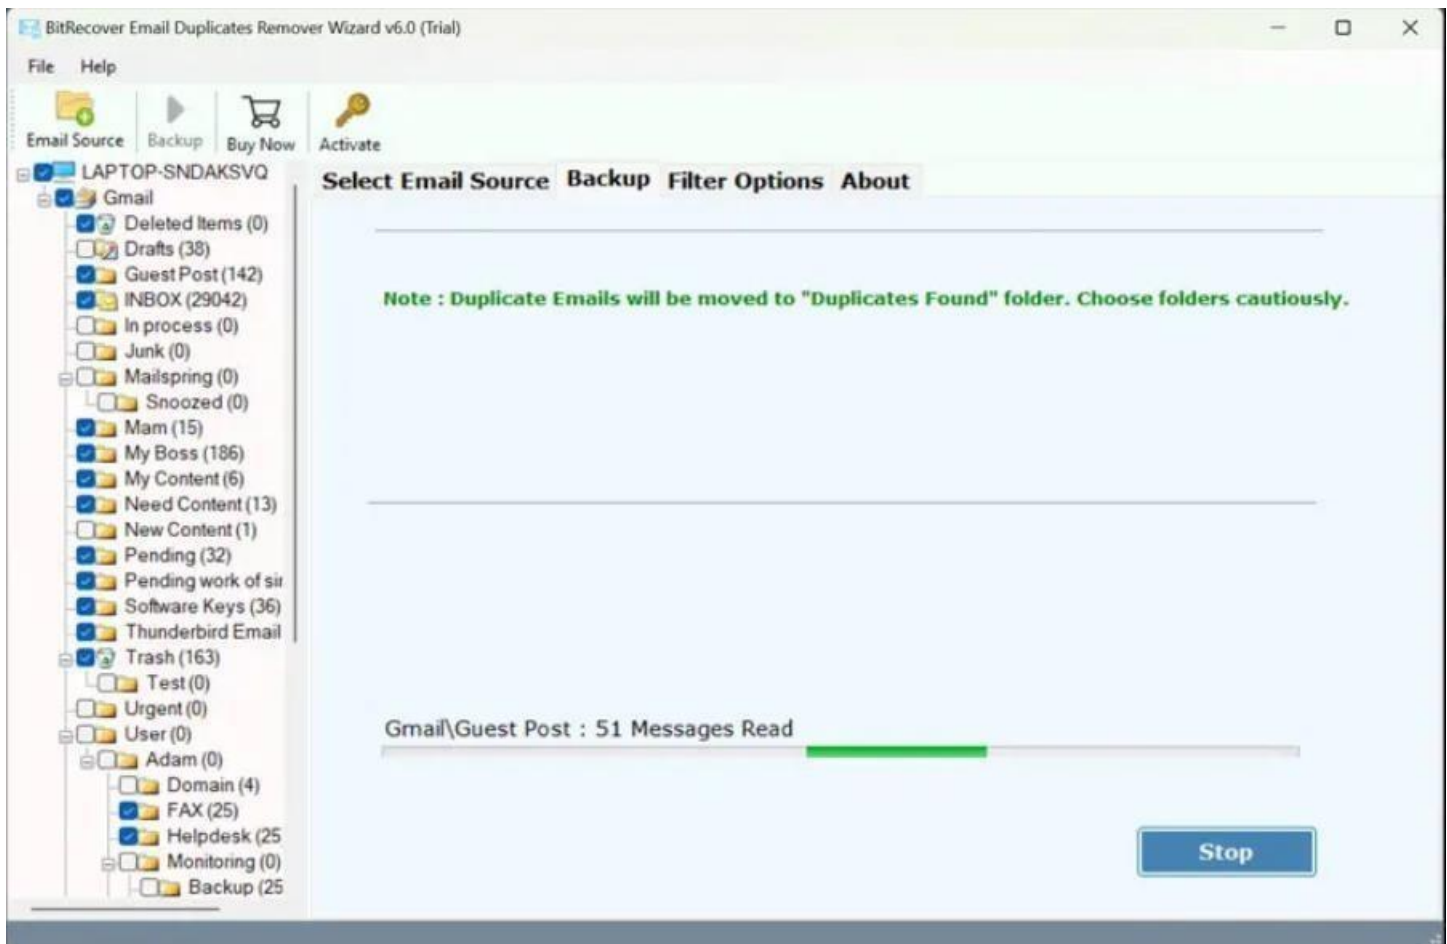

Step 4: If you wish to apply some specific filters, the software panel has the **Filter Options** which has multiple advance settings for filter saving such as **Date Range, From, To, Subject, Saving Folder Naming** and so on.

Step 5: You will get a prompt message asking for your confirmation. Click on the **Yes** button to proceed.

Step 6: Let the software complete the removal process. You can also see the live progress report in the software panel itself.

Step 7: Once the process has been completed, you can simply access the resultant data by navigating to your shared Mail accounts. You will find a separate folder by the name **“Duplicates Found”** having all the duplicates inside it.

By following the above 7 steps, users can easily remove duplicate emails from their inboxes using the Shared Mailbox Duplicate Remover. The software’s intuitive interface allows for quick identification and removal of duplicates based on filters like sender, subject, date, and email body. With batch processing capabilities, users with large email collections can perform deduplication efficiently and without hassle.

Conclusion

Thus, this Shared Mailbox Duplicate Remover provides an effective, user-friendly solution for eliminating duplicate emails from different email accounts. By ensuring the integrity of your email data and optimizing storage space, the software is an excellent tool for both personal and professional use. It is designed to simplify email management, making it ideal for users with large volumes of email data.
