

BitRecover ODT Converter Tool

A perfect software to convert OpenOffice ODT documents with attachments

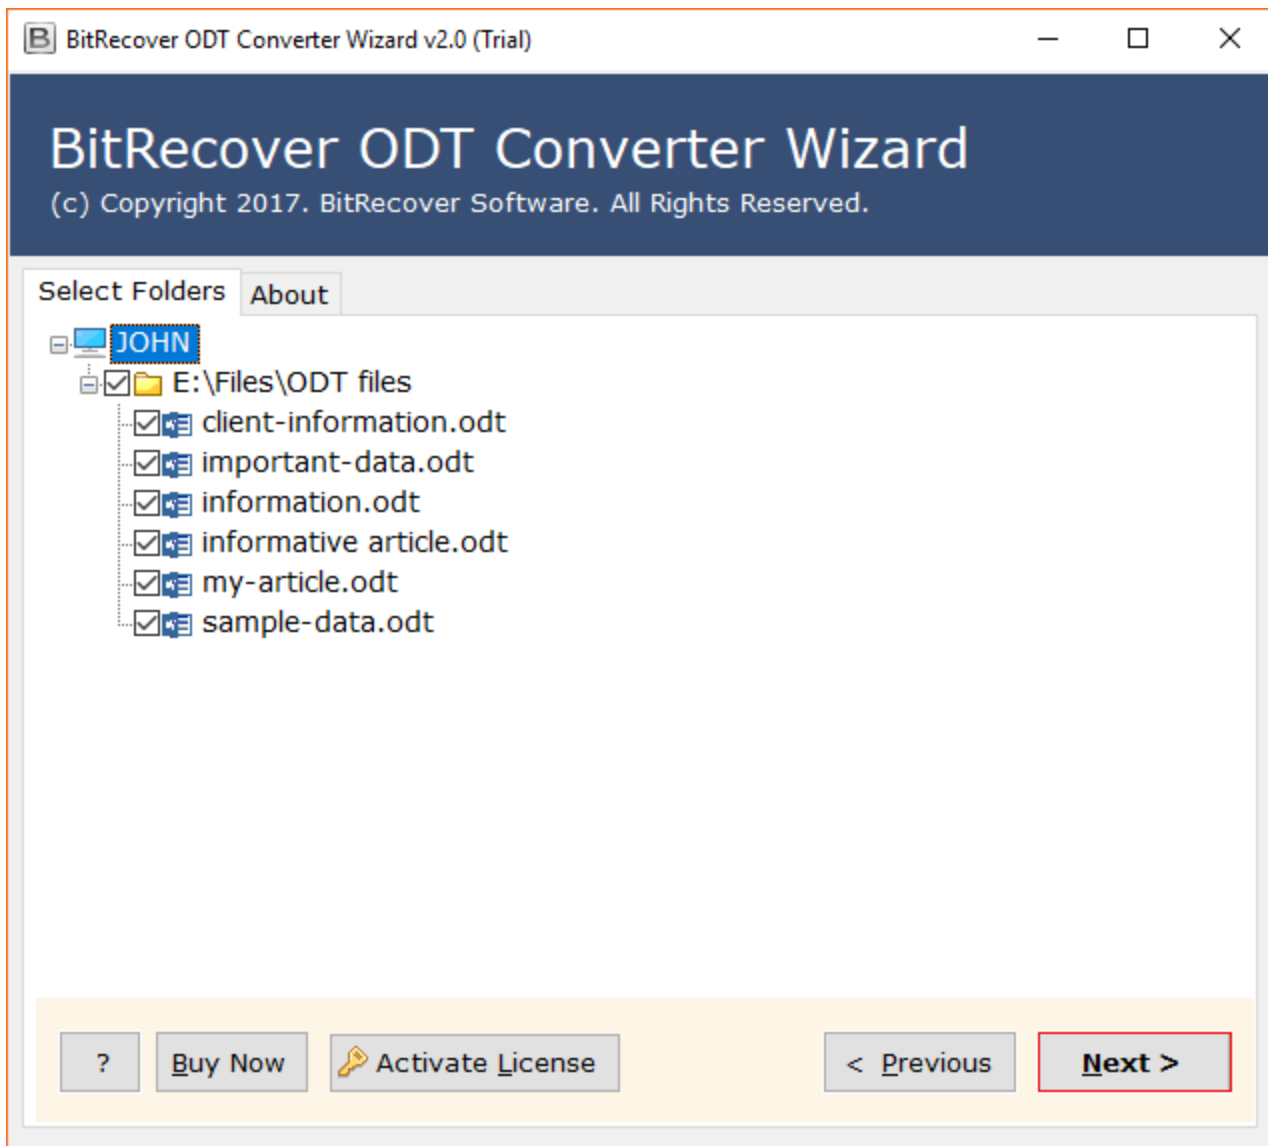

Converting OpenOffice ODDT (Open Document Text) and OTT (Open Document Text Template) files to various formats is essential for users who need to access and share documents across different platforms and applications. This is where the ODT Converter Tool comes into play which basically simplifies this process by enabling users to convert ODT and OTT files into multiple formats, including PDF, DOCX, XLS, HTML, JPG, GIF, BMP, PNG and PSD. This ensures that your document data is versatile and maintains its integrity across different environments.

Visit the official page: [BitRecover ODT Converter Wizard](#)

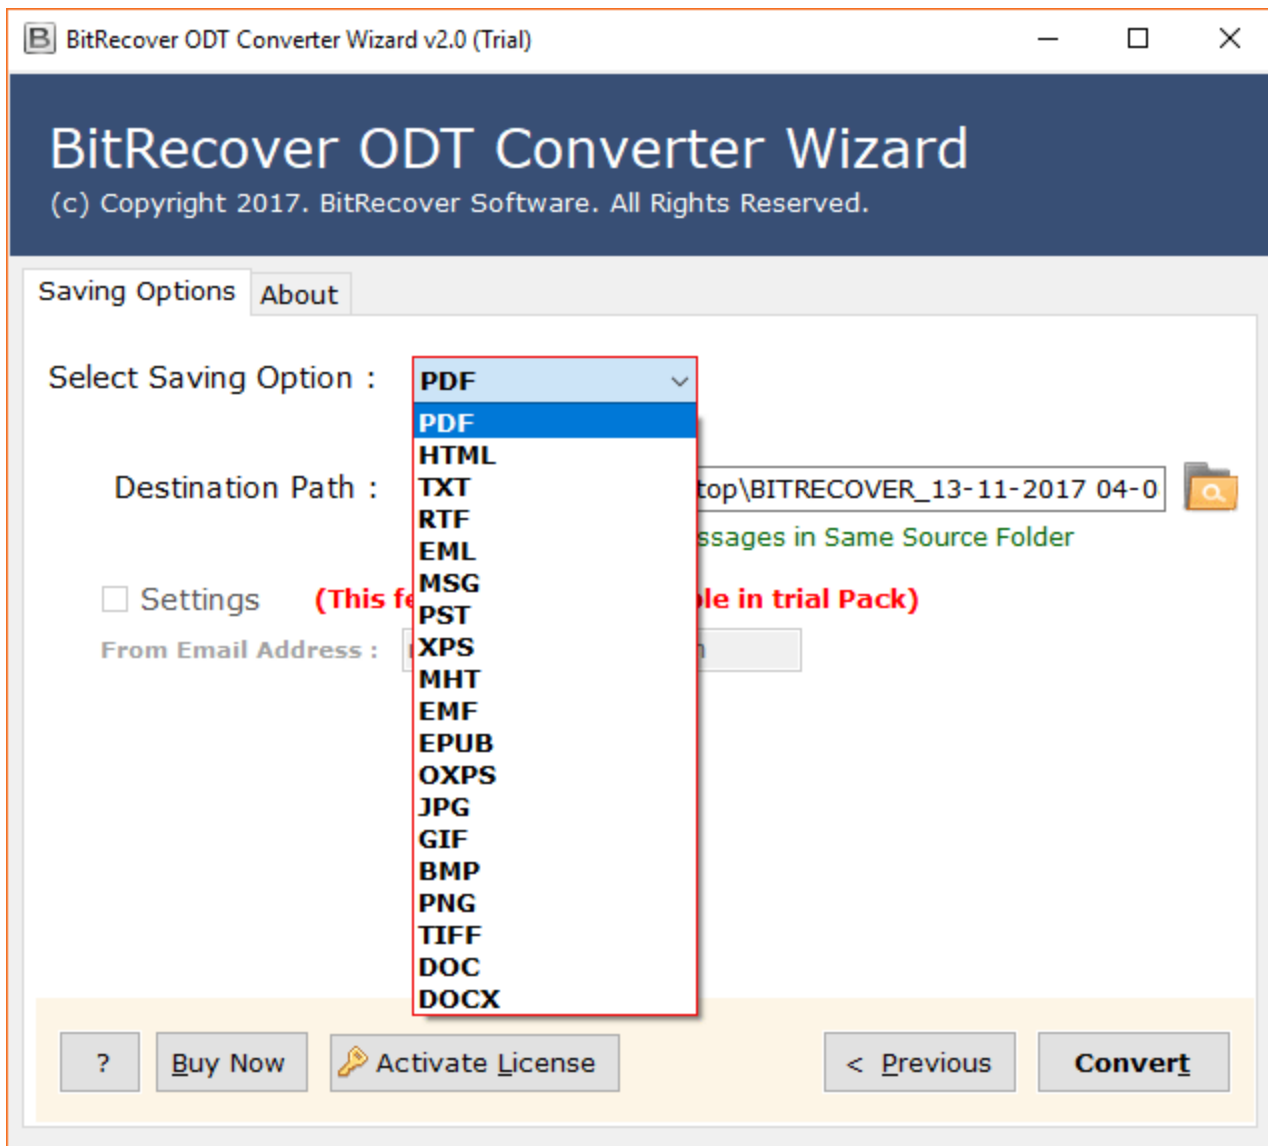

Step 1: Download the ODT Converter Tool and open it. If you wish to upload individual files, click on the **Select Files** option or if you wish to upload folders, click on the **Select Folder** option.

Step 2: Tick the required files/folders and click on the **Next** button.

Step 3: Select a file saving option for the converted files as per your requirement.

Step 4: Choose a destination path to save the converted files as per your requirements and click on the **Convert** button.

By following the above 4 steps, you can efficiently convert your ODT and OTT files in the desired format using this ODT Converter Tool. The software's intuitive interface ensures that even users with limited technical expertise can navigate the conversion process with ease. Its compatibility with various output formats makes it a versatile choice for users seeking to manage their document files across different platforms.

Conclusion

Thus, whether you are preparing documents for distribution, archiving, or sharing in universally accessible formats, this tool offers a reliable and user-friendly solution. A notable feature of this software is its ability to maintain the original formatting and quality during the conversion process, ensuring that your documents remain intact. Additionally, the tool supports batch conversion, allowing you to process multiple ODT and OTT files simultaneously, thereby saving time and effort.
