Step 1: Download the Outlook to Thunderbird Converter and after opening it, go through the instructions given in the software panel. Once you are done with that, click on the **Next** button.

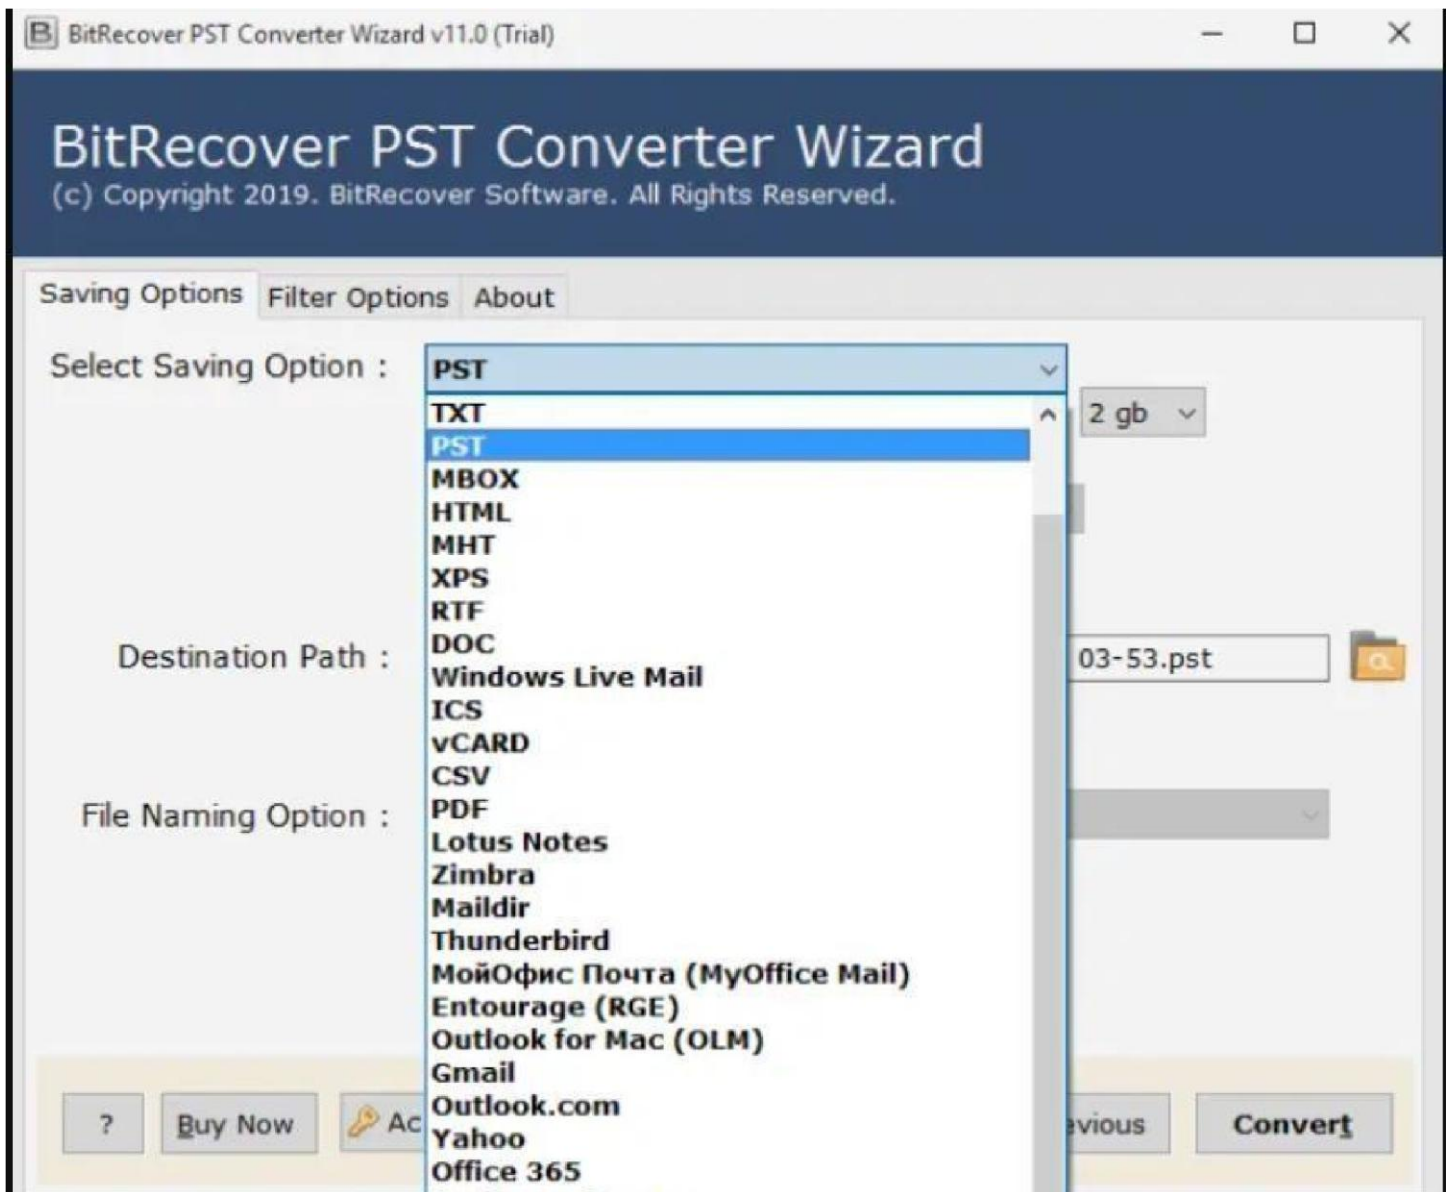

Step 2: If you have Email client installed, you can simply click on the **Convert Configured Outlook Mailbox Data**. If you don't have it installed, then you can manually select files/folders using the second option.

Step 3: The software panel will display the list of all the folders, tick the required ones and click on the **Next** button.

Step 4: Choose a format as the saving option for the converted files from the displayed list of 39+ options. After that, choose a destination path for saving the converted files and click on **Convert** button.

Step 5: After that, software automatically chooses default destination path, click **Convert** button to start the conversion process.

By following the above 5 steps, you can effectively convert your Outlook to Thunderbird using this Outlook to Thunderbird Converter Tool. A notable feature of this software is its advanced filtering options, which allow you to selectively convert Emails based on criteria such as date range, subject or sender, providing quite a user-friendly experience. Its intuitive interface ensures that even users with limited technical expertise can navigate the conversion process with ease.

Conclusion

Thus, whether you are transitioning to a new email client, archiving your emails, or performing data analysis, this tool offers a reliable and user-friendly solution. A standout feature of this software is its ability to maintain the original folder hierarchy and metadata properties during the conversion process, ensuring that your data remains organized and intact. Additionally, the tool supports batch conversion, allowing you to process multiple Outlook files simultaneously, thereby saving time and effort. Additionally, the software's compatibility with both Windows and Mac operating systems makes it a versatile choice for users seeking to manage their Outlook PST files across different platforms.
