**Step 1: Download** the vCard Duplicate Remover Tool and open it. If you wish to upload individual files, click on the **Select Files** option or if you wish to upload folders, click on the **Select Folders** option.

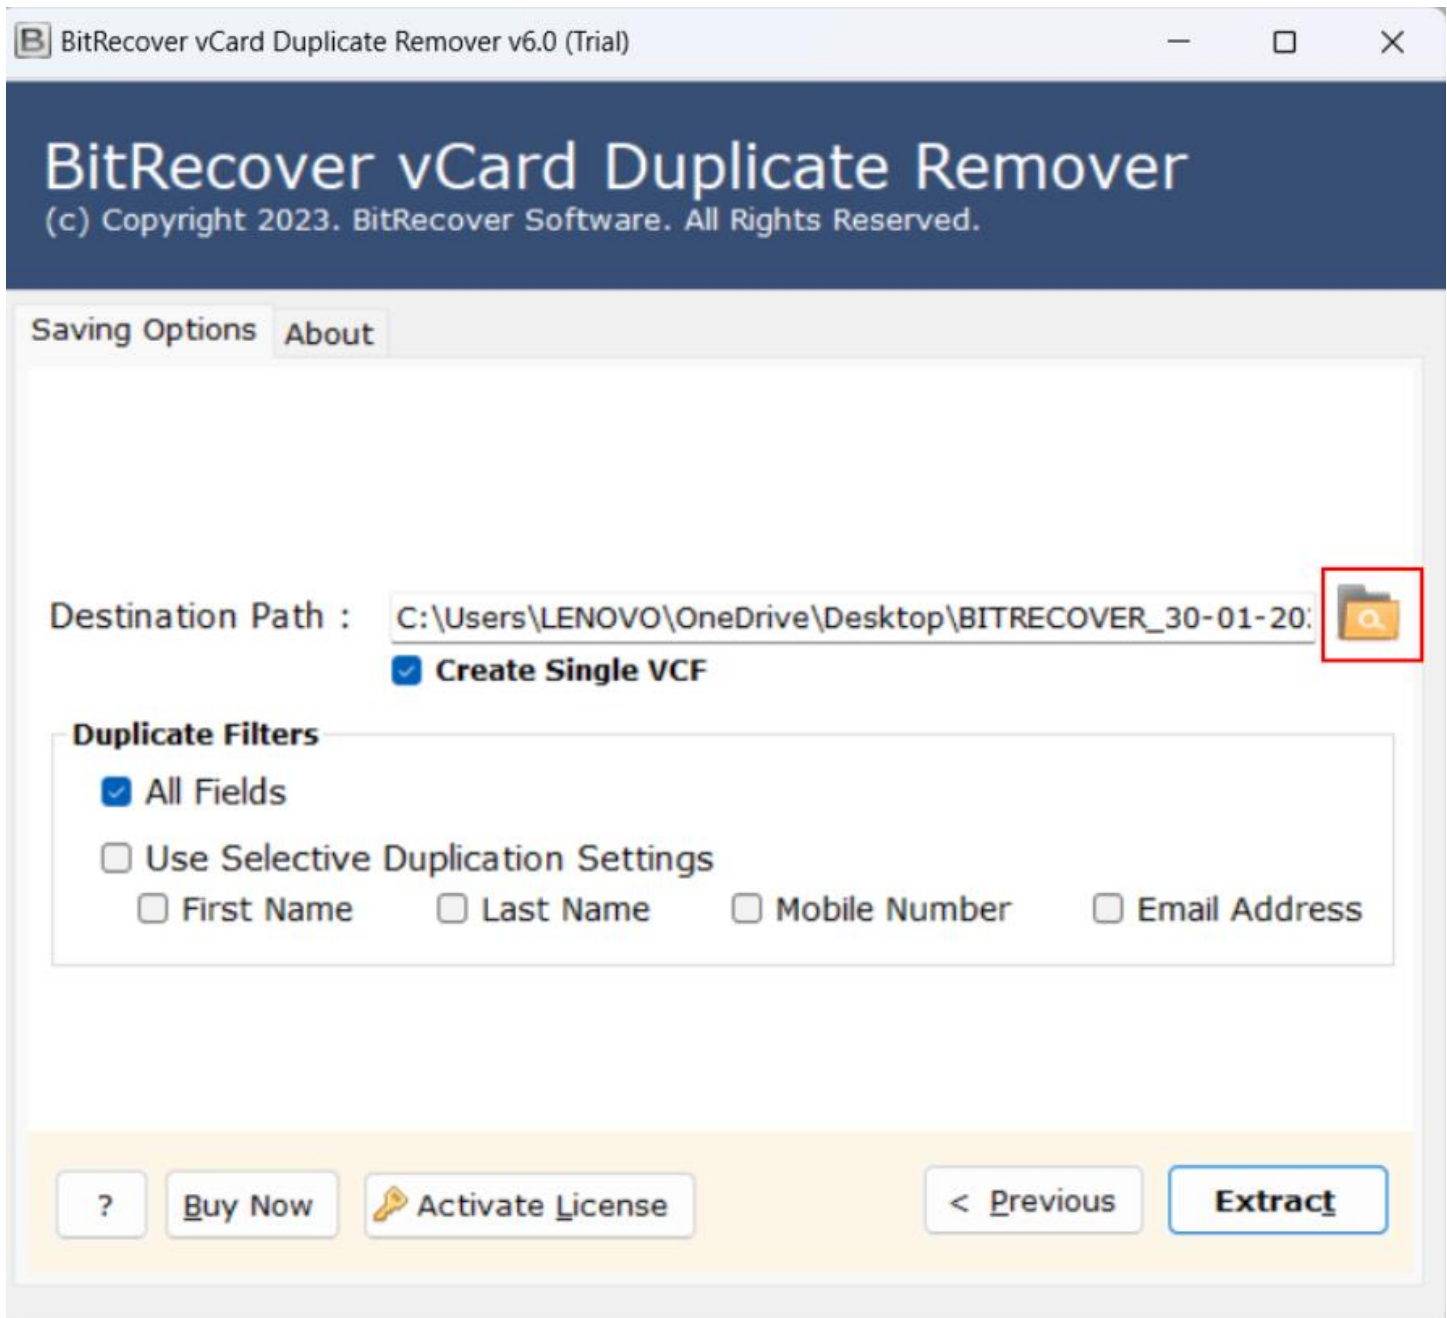

**Step 2:** Tick the required files/folders and click on the **Next** button.

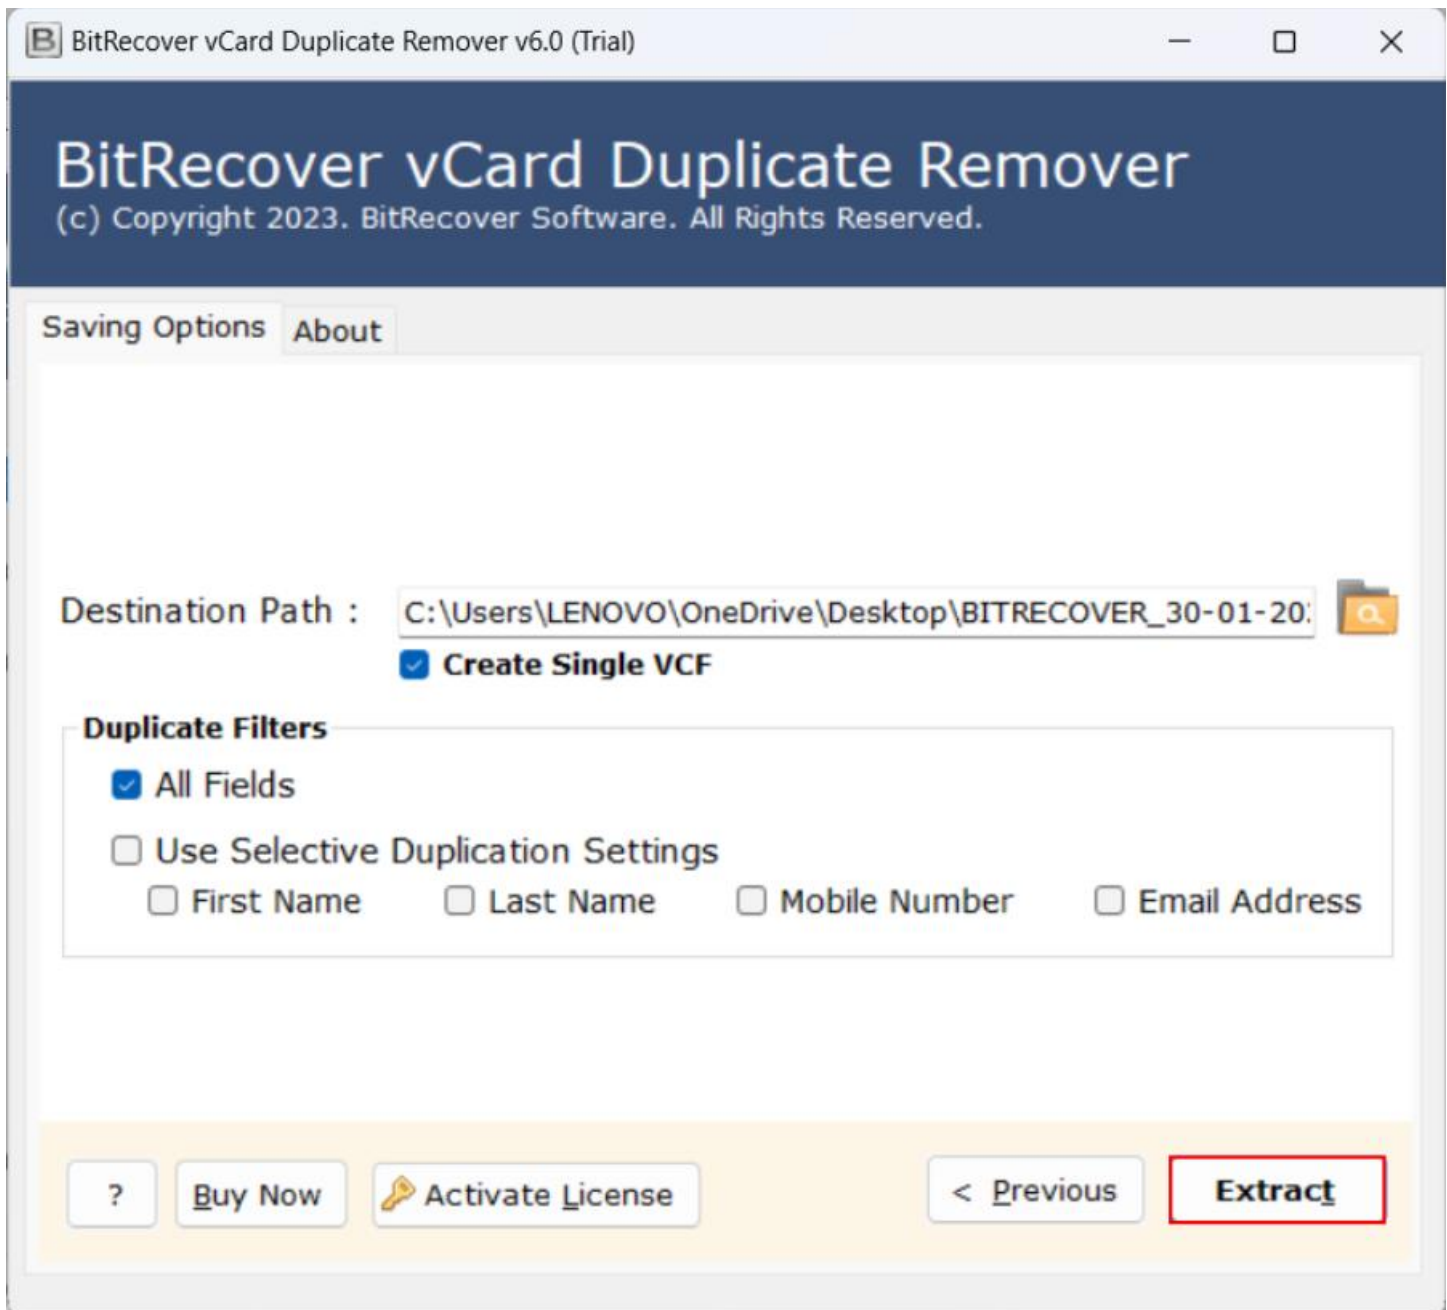

**Step 3:** If you wish to apply some specific duplicate filters, the software provides various options in the panel itself.

**Step 4:** Choose a destination path by clicking on the **Folder** icon to save the resultant data.

**Step 5:** Once you are done with all the previous steps, click on the **Extract** button.

By following the above 5 steps, users can effectively remove duplicate contacts using this vCard Duplicate Remover Tool. The software's intuitive interface allows for easy selection of vCard files or folders, and it provides advanced filters to identify duplicates based on criteria such as first name, last name, mobile number, email address, or all data fields. Its batch processing capability ensures that even users with extensive collections of contacts can manage the deduplication process seamlessly.

### Conclusion

Thus, this vCard Duplicate Remover provides a reliable and efficient solution for removing duplicate contacts from vCard files. Its user-friendly design, combined with features like advanced filtering options and batch processing, ensures that users can perform the deduplication process with ease and precision. By maintaining the integrity of your contact data and optimizing storage space, this tool is ideal for both individual and organizational use.
