## **BitRecover vCard Splitter**

Reliable software to split vCard into multiple contacts

Managing and converting vCard (VCF) files can be challenging, especially when dealing with large volumes of contact data. This is where the vCard Splitter comes into play which basically simplifies this process by enabling users to split vCard into multiple contacts. This ensures seamless access and management of your contacts across different platforms.

Visit the official page: <u>BitRecover vCard Splitter</u>

**Step 1: Download** the vCard Splitter and open it. If you wish to upload individual files, you can choose the **Select Files** option or if you wish to upload folder, you can choose the **Select Folders** option.

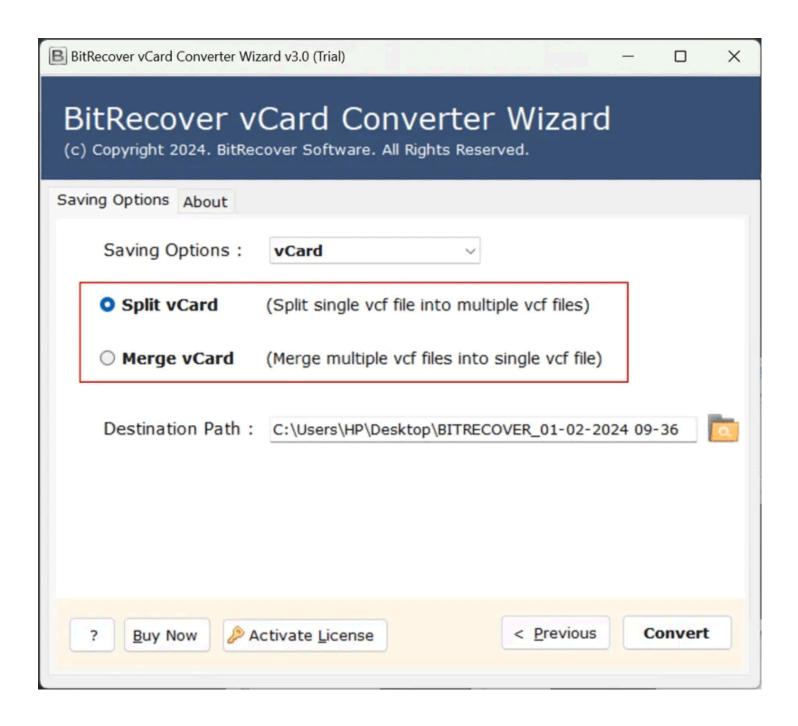

**Step 2:** The software displays the list of all the files/folders in the software panel itself. Tick the required ones and click on **Next** button. You can even preview the contents inside each file/folder.

**Step 3:** Select vCard as saving option from the displayed list of options.

**Step 4:** Browse for a destination path where you wish to store the resultant files and click **Convert** button.

By following the above 4 steps, you can efficiently split vCard into multiple contacts. This software's intuitive interface ensures that even users with limited technical expertise can navigate the conversion process with ease. Its compatibility with various formats makes it a versatile choice for users seeking to manage their contact information across different platforms.

## **Conclusion**

Thus, whether you are migrating contacts to a new email client, consolidating contact data, or archiving information, this tool offers a reliable and user-friendly solution. A notable feature of this software is its ability to maintain the original contact fields during the conversion process, ensuring that your data remains organized and intact. Additionally, the tool supports batch conversion, allowing you to process multiple vCard files simultaneously, thereby saving time and effort.
